Global Meets Digital captures the many nuances of this revolution succinctly including its impact on our lives and business. An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years such as diminishing returns to scale and resource scarcity are no longer valid for a large and growing number of products and services. The book will challenge you to think differently not just about digital products but also about physical products. In the global digital world products are of three kinds: physical, digital, and smart machines products that are both physical and digital and connected to the internet, a distinction missed by most books on strategy and global business. The economics of each kind of products is distinct from that of the others which has strategic implications for all kinds of businesses, implications such as how to compete and how to create and capture value. With several mini case studies and over 100 company examples, the book covers themes and cutting edge issues like the paradox of globalization, digital disruption, disruptive business models, exponential technologies, Internet of Things, competition in digital markets, winner take all market dynamics, Industry 4.0, how to innovate, strategizing for the New Normal, and value creation and value capture in both B2C and B2B contexts. The book derives its underpinnings from the practice of global and digital business while theory remains in the background. Intended specifically for an executive professional audience, Global Meets Digital should also be of value to business students and professors learning to dip their toes into a digital world. Vinod Jain is an expert in global and digital strategy, award winning professor, Fulbright Scholar, and author of an MBA textbook, Global Strategy. He taught at the Rutgers Business School, Newark and New Brunswick, and the Robert H. Smith School of Business, University of Maryland, College Park. At Maryland, he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School's Executive MBA program in China. Since leaving Maryland, he has taught in China, Denmark, Finland, Poland, and India as a visiting or term professor. His opinion pieces have appeared in The Washington Post, The Baltimore Sun, Mensa Bulletin, and Economic Times, and Mint India's 1 and 2 business dailies among other media. In the past, he worked as a middle and senior level executive with American and British multinationals. Vinod has a PhD in Strategy and International Business from the University of Maryland, College Park; MS in Management from UCLA; and MS and BS Hons in Statistics from the Indian Statistical Institute, Calcutta.

Sports Media Rights in the Age of Streaming and Platformisation Tom Evens, Paul Smith, 2024-12-18. Against a backdrop of increased online distribution of media, this book provides an in-depth analysis of how the platformisation of television is both shaping and being shaped by the changing sports media market. Beginning by looking at the business models and strategies of the major stakeholders involved in the sports broadcasting value chain, the authors go on to focus on the challenges and opportunities posed by the growth of OTT delivery for the regulation of sports broadcasting in several key areas, including copyright law and piracy, competition issues linked to the buying, selling, and distribution of premium sports content, and legislation designed to safeguard coverage of certain national and international sporting events for free-to-air television. Key areas of

continuity such as the persistence of national regional markets the importance attached to premium sports rights by rival delivery platforms as a source of market power and the need to update key areas of policy and regulation in order to address challenges posed by the use of OTT delivery are also discussed This book makes use of a range of international and regional examples and case studies not least the Olympic Games and the FIFA World Cup and identifies different strategies employed in the buying selling and distribution of sports rights for all major parties in the sports media value chain including new entrant OTT players traditional pay TV operators public service broadcasters and a range of international sports organizations Providing a complete assessment of the relevance and future effectiveness of key areas of policy and regulation in sports media distribution this book is recommended reading for advanced students and researchers of Sports Media Sports Management and Media Industries **Handbook of Research on Counterfeiting and Illicit Trade** Peggy E.

Chaudhry,2017-07-28 This unique Handbook provides multiple perspectives on the growth of illicit trade primarily exploring counterfeits and internet piracy It includes expert opinion on a wide range of topics including the evaluation of key global enforcement issues government and private sector agency initiatives to stifle illicit trade and the evolution of piracy on the internet The authors also assess the efficacy of anti counterfeiting strategies such as targeted consumer campaigns working with intermediaries in the supply chain authentication technology and online brand protection **Data Mining Mobile**

Decentralization talks about various decentralization technologies including Web3 decentralized identity and decentralized storage and how they can be incorporated in traditional tech architectures to improve technical and business performance In this book the authors take us on a journey through the tech landscape exploring how decentralized technologies including Web3 are on the verge of becoming mainstream and offer a practical roadmap for understanding and embracing this shift Web2 brought us the great centralization by centralizing not only data but also business processes blurring the industry boundaries So payment platforms started offering e commerce services and ride hailing services started delivering food Scale became the most effective moat But at the same time these huge platforms became a magnet for security threats and started violating user privacy rights and consumer rights The authors argue that the technological regulatory and social landscape is ready for the next evolution of technology systems as decentralization technologies get incorporated into traditional architectures This book serves as a guide for readers to understand the fundamentals of Web3 along with other decentralized technologies and creates a framework for incorporating them into traditional architectures At the same time the authors explore the organization level as well as the macro implications of decentralized technologies **The Cost of**

Free Shipping Jake Alimahomed-Wilson, Ellen Reese, 2020-09-20 Winner of the UALE Book Award 2021 Amazon is the most powerful corporation on the planet and its CEO Jeff Bezos has become the richest person in history and one of the few people to profit from a global pandemic. Its dominance has reshaped the global economy itself; we live in the age of Amazon Capitalism. One click, instant consumerism, and its immense variety of products has made Amazon a worldwide household name, with over 60% of US households subscribing to Amazon Prime. In turn, these subscribers are surveilled by the corporation. Amazon is also one of the world's largest logistics companies, resulting in weakened unions and lowered labor standards. The company has also become the largest provider of cloud computing services and home surveillance systems, not to mention the ubiquitous Alexa. With cutting-edge analyses, this book looks at the many dark facets of the corporation, including automation, surveillance, tech work, workers' struggles, algorithmic challenges, the disruption of local democracy, and much more. *The Cost of Free Shipping* shows how Amazon represents a fundamental shift in global capitalism that we should name, interrogate, and be primed to resist.
