A. Mussari, AIR COMMAND AND STAFF COLL MAXWELL AFB AL., 1985 The author set out to see if the accuracy of the FR FI manuals is a factor in their non use Accuracy of the manuals was determined by analyzing actual reported inflight discrepancies Fault code accuracy was obtained by comparing each discrepancy as written on the TAC Form 122 Debriefing Record with the discrepancy depicted in the FR manual Accuracy of repair actions was obtained by tracking the repair action recommended by the fault isolation manual and comparing it with that shown on the TAC Form 122 Analysis revealed the F 15 fault reporting manual can accurately represent a random inflight malfunction 83 8% of the time and these malfunctions can be accurately isolated in the fault isolation manual 77 7% of the time These accuracy levels are acceptable and not a major factor in the non use of the manuals Observation of the debriefing and maintenance process and interviews with aircrews and maintenance technicians revealed a general lack of understanding and confidence in the FR FI system This lack of understanding and confidence exhibited by both aircrews and maintenance personnel is the primary reason for the system s non use Recommended actions to show the effectiveness of using the system as designed are provided MSN, Microwave Systems

Procedure for Application of Mathematical Techniques to Fault Isolation RADIO CORP OF AMERICA BURLINGTON MA AEROSPACE SYSTEMS DIV.,1964 This manual describes the application of a mathematical technique for performing fault isolation of electronic circuits The technique developed makes use of a general purpose digital computer to determine mathematically which component has failed This technique is based upon the theory of inverse probability and comprises two major parts The first part involves computing theoretical failure symptoms for a particular circuit configuration for which fault isolation is desired This step would be accomplished at a Program Preparation Facility The second part involves taking actual data on a failed circuit and introducing these data along with the pre computed failure symptoms into a Fault Isolation Computer Program to select the faulty component This second part is accomplished at a Field Installation and would be performed for each failed circuit as the workload of these circuits demands The manual describes the steps required for the implementation of both parts Author *FAULT ISOLATION IN ENVIRONMENTAL CONTROL SYSTEMS OF COMMERCIAL TRANSPORTS* AC-9 Aircraft Environmental Systems Committee,1993 This AIR outlines concepts for the design and use of fault isolation equipment that have general application However the specific concern applies only to use with Environmental Control Systems in commercial transports In particular automatic Built In Test Equipment BITE with manual initiation and software programs are covered as systems already in use **Procedures for Automatic Fault Isolation Using Test Loops** British Standards Institution,1990 *Human Factors Test and Evaluation as Tools for Developing Improved Aircraft Fault Isolation Aids, Based on Pattern of Cockpit Indications*, by A.A. Specification of Optimum Fault Isolation Presentation W. R. Atchley,J. Ver Hulst,D. J. Lehr,1964 The report describes the development of a System Analysis Model SAM utilizing equipment characteristics and maintenance environments of Air Force equipments which provides a guide for technical writers in the selection of the most efficient fault isolation presentations for current and R D systems From this model three characteristics which affect the efficiency of fault isolation presentation formats were selected for experimental manipulation and evaluation These characteristics 1 type of circuitry 2 type of indicators and 3 system complexity were used to evaluate the relative efficiency in terms of performance accuracy and time of three fault isolation presentation formats 1 standard schematics 2 data flow diagrams and 3 proceduralized instructions Their nonsignificant differences suggest that the criterion for choosing between standard schematics and data flow diagrams would be the cost of development when dealing with equipments with similar

characteristics Significantly proceduralized instructions were found to be more efficient than the other two formats Abstract
