A World Beyond Difference Cultural Identity In The Age Of Globalization:

A World Beyond Difference Ronald Niezen, 2008-04-15 A World Beyond Difference unpacks the globalization literature and offers a valuable critique one that is forthright yet balanced and draws on the local work of ethnographers to counter relativist and globalist discourses Presents a lively conceptual and historical map of how we think about the emerging socio political world and above all how we think politically about human cultural differences Interprets criticizes and frames responses to world culture Draws from the work of recent major social theorists comparing them to classical social theorists in an instructive manner Grounds critique of theory in years of ethnographic research

China Developing: Cultural Identity Of Emerging Societies George Fusun Ling, 2008-03-13 This book deals with the intellectual foundation of the sociopolitical economic and legal systems of developing countries using a methodological approach It calls for not only the need to search for a country's cultural identity but also a need to analyze the prevalent concepts important to a contemporary modern society such as the respect for an individual human rights freedom equality democracy and the universal respect for law Based on the author's lifelong reflection on why some of these deeply treasured Western values and institutions have not been useful in developing democracy in Asia it examines which values are applicable and which are not to Asian emerging societies Using China's historical and contemporary attempts in modernization and development the author suggests that all mighty rivers are confluences of multiple tributaries Likewise an emerging society has to recognize that the dynamism of its history would also be derived from a confluence of multiple cultural traditions As a valuable resource for decision makers of developing countries this book will help to shed some light on the potential pitfalls and fallacies they may encounter in their search for a cultural identity and values to subscribe to among the many that are circulating in our globalized world

Buechler, 2016-05-04 This volume examines the importance of establishing egalitarian relationships in fieldwork and acknowledging the impact these relationships have on scholarly findings and theories The editors and their contributors investigate how globalization affects this relationship as scholars are increasingly involved in shared networks and are subject to the same socio economic systems as locals The editors argue for a processual approach that begins with an analysis of researchers personal and professional backgrounds that inform the cooperative relationships they establish during fieldwork often a long term process in countries such as Mexico Guatemala Honduras Colombia Ecuador Bolivia and Brazil

Applied Anthropology in Canada Edward J. Hedican, 2008-07-05 Anthropologists are often reluctant to present their work relating to matters of a broad social context to the wider public even though many have much to say about a range of contemporary issues In this second edition of a classic work in the field Edward J Hedican takes stock of Anthropology's research on current indigenous affairs and offers an up to date assessment of Aboriginal issues in Canada from the perspective of applied Anthropology In his central thesis Hedican underlines Anthropology's opportunity to make a significant impact on the way Aboriginal issues

are studied perceived and interpreted in Canada He contends that anthropologists must quit lingering on the periphery of debates concerning land claims and race relations and become more actively committed to the public good His study ranges over such challenging topics as advocacy roles in Aboriginal studies the ethics of applied research policy issues in community development the political context of the self government debate and the dilemma of Aboriginal status and identity in Canada Applied Anthropology in Canada is an impassioned call for a revitalized Anthropology one more directly attuned to the practical problems faced by First Nations peoples Hedican s focus on Aboriginal issues gives his work a strong contemporary relevance that bridges the gap between scholarly and public spheres

Public Justice and the Anthropology of Law

Ronald Niezen,2010-10-21 In this powerful timely study Ronald Niezen examines the processes by which cultural concepts are conceived and collective rights are defended in international law Niezen argues that cultivating support on behalf of those experiencing human rights violations often calls for strategic representations of injustice and suffering to distant audiences The positive impulse behind public responses to political abuse can be found in the satisfaction of justice done But the fact that oppressed peoples and their supporters from around the world are competing for public attention is actually a profound source of global difference stemming from differential capacities to appeal to a remote unknown public Niezen s discussion of the impact of public opinion on law provides fresh insights into the importance of legally constructed identity and the changing pathways through which it is being shaped crucial issues for all those with an interest in anthropology politics and human rights law
