#### **Safe Take-off with Runway Analyses**

Boris Urbanek, 2013-05-17. The economic situation of the recent years forces to operate aircraft at highest payloads possible and to load it at its maximum allowable take off masses. Therefore, take off performance optimization is nowadays as important as never before. This book

offers a summary of factors affecting the maximum take off mass and appropriate take off speeds which together represent necessary performance data for a safe take off. These are usually presented in so called runway analyses. That is the reason why this book might be of interest for flight operations engineering personnel or pilots as it answers possible questions about the application and computing of the runway analyses.

**Man-Machine-Environment System Engineering** Shengzhao Long, Balbir S. Dhillon, 2017-08-21. These proceedings showcase the best papers selected from more than 500 submissions introducing readers to the top research topics and the latest developmental trends in the theory and application of Man Machine Environment System Engineering (MMESE). This research topic was first established in China by Professor Shengzhao Long in 1981 with direct support from one of the greatest modern Chinese scientists Xuesen Qian. In a letter to Shengzhao Long from October 22nd 1993 Xuesen Qian wrote "You have created a very important modern science and technology in China. MMESE primarily focuses on the relationship between Man Machine and Environment studying the optimum combination of related Man Machine Environment systems. In this paradigm Man refers to working people as the subject at the workplace e.g. operators, decision makers. Machine is the general name for any object controlled by Man including tools, machinery, computers, systems and technologies and Environment describes the specific working conditions under which Man and Machine interact e.g. temperature, noise, vibration, hazardous gases etc. In turn the three goals of optimization are to ensure safety, efficiency and economy in this context. These proceedings present interdisciplinary studies on the concepts and methods of physiology, psychology, system engineering, computer science, environmental science, management, education and other related disciplines. They offer a valuable resource for all researchers and professionals whose work involves interdisciplinary areas touching on MMESE subjects."
