Roadside Design Guide American Association of State Highway and Transportation Officials. Task Force for Roadside Safety, 2011 The Roadside Design Guide presents a synthesis of current information and operating practices related to roadside safety and is written in dual units metric and U S Customary This book is a guide It is not a standard nor is it a design policy It is intended to use as a resource document from which individual highway agencies can develop standards and policies Although much of the material in the guide can be considered universal in its application several recommendations are subjective in nature and may need modification to fit local conditions However it is important that significant deviations from the guide be based on operational experience and objective analysis The 2011 edition of the AASHTO Roadside Design Guide has been updated to include hardware that has met the evaluation criteria contained in the National Cooperative Highway Research Program NCHRP Report 350 Recommended Procedures for the Safety Performance Evaluation of Highway Features and begins to detail the most current evaluation criteria contained under the Manual for Assessing Safety Hardware 2009 MASH For the most part roadside hardware tested and accepted under older guidelines that are no longer applicable has not been excluded in this edition AASHTO website *Roadway Lighting Design Guide* American Association of State Highway and Transportation Officials, 2005 This guide replaces the 1984 publication entitled An Informational Guide for Roadway Lighting It has been revised and brought up to date to reflect current practices in roadway lighting The guide provides a general overview of lighting systems from the point of view of the transportation departments and recommends minimum levels of quality The guide incorporates the illuminance and luminance design methods but does not include the small target visibility STV method *AASHTO LRFD Bridge Design Guide Specifications for GFRP-reinforced Concrete Bridge Decks and Traffic Railings*, 2009 Glass fiber reinforced polymer GFRP materials have emerged as an alternative material for producing reinforcing bars for concrete structures GFRP reinforcing bars offer advantages over steel reinforcement due to their noncorrosive nature and nonconductive behavior Due to other differences in the physical and mechanical behavior of GFRP materials as opposed to steel unique guidance on the engineering and construction of concrete bridge decks reinforced with GFRP bars is needed These guide specifications offer a description of the unique material properties of GFRP composite materials as well as provisions for the design and construction of concrete bridge decks and railings reinforced with GFRP reinforcing bars **A Policy on Geometric Design of Highways and Streets, 2011** American Association of State Highway and Transportation Officials, 2011 **Geometric Design of Roads Handbook** Keith Wolhuter, 2015-10-05 Explore the Art and Science of Geometric Design The Geometric Design of Roads Handbook covers the design of the visible elements of the road its horizontal and vertical alignments the cross section intersections and interchanges Good practice allows the smooth and safe flow of traffic as well as easy maintenance Geometric design is covered in d **Urban Transport XXVI** S. Syngellakis, 2020-11-24 A continuous requirement for better

urban transport systems and the need for a healthier environment has resulted in an increasing demand for new solutions Innovative systems new approaches and original ideas need to be thoroughly tested and critically evaluated before they can be implemented in practice Moreover there is a growing need for integration with telecommunications systems and IT applications in order to improve safety security and efficiency This volume also addresses the need to solve important pollution problems associated with urban transport in order to achieve a healthier environment The variety of topics covered by the included research works which were presented at the 26th International Conference on Urban Transport and the Environment reflect the complex interaction of urban transport systems with their environment and the need to establish integrated strategies The goal is to arrive at optimal socio economic solutions while reducing the negative environmental impacts of current transportation systems
