Ravenna and the Traditions of Late Antique and Early Byzantine Craftsmanship Salvatore Cosentino, 2020-08-10 In the last twenty years scholarship on late antique and early medieval Ravenna has resulted in a certain number of publications mainly focused on the fields of architecture mosaics and archaeology On the contrary much less attention has been paid on labour both manual and intellectual as well as the structure of production and objects derived from manufacturing activities despite the fact that Ravenna is the place which preserves the highest number of historical evidence among all centres of the late Roman Mediterranean Its cultural heritage is vast and composite ranging from papyri to inscriptions from ivories to marbles as well as luxury objects pottery and coins Starting from concrete typologies of hand manufactured goods existing in the Ravennate milieu the book aims at exploring the multifaceted traditions of late antique and early Byzantine handicraft from the fourth to the eighth century AD Its

perspective is to pay attention more on patronage social taste acculturation workers and the economic industry of production which supported the demand circulation and distribution of artefacts than on the artistic evaluation of the objects themselves
