science fact or science fiction Superman Batman The X Men Flash Spider Man they protect us from evildoers defend truth and justice and occasionally save our planet from certain doom Yet how much do we understand about their powers In this engaging yet serious work Lois Gresh and Robert Weinberg attempt to answer that question once and for all From X ray vision to psychokinesis invisibility to lightspeed locomotion they take a hard scientific look at the powers possessed by all of our most revered superheroes and a few of the lesser ones in an attempt to sort fact from fantasy In the process they unearth some shocking truths that will unsettle alarm and even terrify all but the most fiendish of supervillains **The Australian Journal of Science** ,1953 **Commerce, Justice, Science, and Related Agencies Appropriations for 2015** United States. Congress. House. Committee on Appropriations. Subcommittee on Commerce, Justice, Science, and Related Agencies,2014 Gerard P. Kuiper and the Rise of Modern Planetary Science Derek W. G. Sears,2019-03-26 Astronomer Gerard P Kuiper ignored the traditional boundaries of his subject Using telescopes and the laboratory he made the solar system a familiar intriguing place It is not astronomy complained his colleagues and they were right Kuiper had created a new discipline we now call planetary science Kuiper was an acclaimed astronomer of binary stars and white dwarfs when he accidentally discovered that Titan the massive moon of Saturn had an atmosphere This turned our understanding of planetary atmospheres on its head and it set Kuiper on a path of staggering discoveries Pluto was not a planet planets around other stars were common some asteroids were primary while some were just fragments of bigger asteroids some moons were primary and some were captured asteroids or comets the atmosphere of Mars was carbon dioxide and there were two new moons in the sky one orbiting Uranus and one orbiting Neptune He produced a monumental photographic atlas of the Moon at a time when men were landing on our nearest neighbor and he played an important part in that effort He also created some of the world s major observatories in Hawai i and Chile However most remarkable was that the keys to his success sprang from his wartime activities which led him to new techniques This would change everything Sears shows a brilliant but at times unpopular man who attracted as much dislike as acclaim This in depth history includes some of the twentieth century s most intriguing scientists from Harold Urey to Carl Sagan who worked with and sometimes against the father of modern planetary science Now as NASA and other space agencies explore the solar system they take with them many of the ideas and concepts first described by Gerard P Kuiper The Century of Space Science J.A. Bleeker,Johannes Geiss,M. Huber,2012-12-06 One of the most attractive features of the young discipline of Space Science is that many of the original pioneers and key players involved are still available to describe their field Hence at this point in history we are in a unique position to gain first hand insight into the field and its development To this end The Century of Space Science a scholarly authoritative reference book presents a chapter by chapter retrospective of space science as studied in the 20th century The level is academic and focuses on key discoveries how these were arrived at their scientific consequences and how these discoveries advanced the thoughts of the key players involved With over 90 world class contributors such as James Van Allen

Cornelis de Jager Eugene Parker Reimar Lüst and Ernst Stuhlinger and with a Foreword by Lodewijk Woltjer past ESO Director General this book will be immensely useful to readers in the fields of space science astronomy and the history of science Both academic institutions and researchers will find that this major reference work makes an invaluable addition to their collection *Space Science and Astronomy Theatre* Margaret Boone Rappaport, Christopher J. Corbally, 2017-08-09 If you're a teacher or parent struggling to get youngsters or young adults interested in space science and astronomy or an inquisitive student then you'll love this fun filled book of theatrical scenes In addition to astronomers and astronauts the scenes also feature engineers accountants graphic artists public relations practitioners biologists meteorologists and others who play a critical role in space adventures Scenarios will take you into the past and into the future and include A cosmologist and a computer graphics artist are preparing a presentation for public television on theories about the distribution of galaxies in the universe and the placement of voids where no galaxies are found An astrobiologist and an engineer discover the first positive biosignature data from an exoplanet near Earth The findings provide a big surprise Two recent high school graduates explore a star factory nebula in the constellation Orion and using a video arcade game they make speculations about the future While the props and costumes needed for scripts are minimal the scenes promote deep learning Get ready to be entertained and informed with *Space Science and Astronomy Theatre*
