AT-Index Winka Dubbeldam, Archi-Tectonics, 2006 Publisher description *Pulsation in Architecture* Eric Goldemberg, 2012 *Pulsation in Architecture* highlights the role of digital design as the catalyst for a new spatial sensibility related to rhythmic perception. It proposes a novel critical reception of computational architecture based on the ability of digital design to move beyond mere instrumentality and to engage with core aspects of the discipline: the generative engine of digital architecture reinvigorates a discourse of part to whole relationships through the lens of rhythmic affect. There is a paradigm shift in spatial perception due to the intense use of computational techniques and the capacity to morph massive amounts of data in spatial patterns: rhythm plays a pivotal role in the articulation of the topology of buildings, generating the atmospheric character that induces moods and throbbing sensations in space. *Pulsation* introduces the fundamental animate capacity of living form and reshapes our perception of architectural space across the multiple scales of a project from digital inception to fabrication. An emerging thread of rhythmic sensibility loosely binds a survey of contemporary design practices including contributions by Peter Eisenman, Jeff Kipnis, Greg Lynn, UNStudio, Preston Scott Cohen, Reiser Umemoto, Asymptote, Ali Rahim, Hernan Diaz Alonso, Ruy Klein, Gage Clemenceau, NOX, Evan Douglas, Studio kokkugia, and MONAD Studio.

Strange Objects, New Solids and Massive Things Winka Dubbeldam, 2022-01-05 The object as solid having three dimensions is not just a different formal trend but a paradigm shift: a reconceiving of how the architectural object is produced and experienced, changing the very concept of objectivity and meaning of architecture. This book celebrates the potential of the strange object, which finds its origin in the proto-space, the moment between the becoming of the idea and the ultimate shape it takes, the state of the still obscure and uninhibited object outside the established framework of signification. As seen through an examination of 10 projects by Archi Tectonics, this strange object is proof of the very capacity of the object to generate new habits and meanings. For close to a century, modernism was the norm presented to culturally aware citizens as the expression of modern life. It arrived hand in hand with medical advances, mass standardization, and a shared ideal of what the ease and speed of the modern lifestyle could offer. Only in the early years of the 21st century did our widespread allegiance begin to shift away from modernism and towards a new social realm. The digital revolution introduced online societies, niche cultures, and digital design. Digital manufacturing facilitated opportunities of surface patterning and the fabrication of one-off special building components, removing the constraints of standardization in the construction industry and celebrating the experimental. Testing designs through prototypes allows for a much more informed decision-making process. The focus is on precise, rigorous research and development rather than representational models. Now, after nearly two decades of implementing digital tools, we have reached a new platform where digital design and robotic production are the norm, and by extension, digital craft and integral design are as the future. This has been particularly important in the rethinking of advanced digital design processes. As showcased and examined in *Strange Objects, New Solids and Massive*

Forms from the earliest projects and regardless of scale Archi Tectonics has valued performance over form design intelligence over style Through prototypes and mock ups process documentation and testimonials the book presents 10 current and recent projects that celebrate the particular and singular over the ideal and universal With Contributions of Manuel DeLanda Jonathan Jackson *Art Book News Annual, volume 4: 2008* *Art Book News Annual, volume 4: 2008* , *Art Index Retrospective* ,2006 *Architecture, Media, and Memory* Joel McKim,2019-12-26 Architecture Media and Memory examines the wide range of urban sites impacted by September 11 and its aftermath from the spontaneous memorials that emerged in Union Square in the hours after the attacks to the reconstruction at Ground Zero to vast ongoing landscape urbanism projects beyond Yet this is not simply a book about post 9 11 architecture It instead presents 9 11 as a multifaceted case study to explore a discourse on memory and its representation in the built environment It argues that the reconstruction of New York must be considered in relation to larger issues of urban development ongoing global conflicts the rise of digital media and the culture philosophy and aesthetics of memory It shows how understanding architecture in New York post 9 11 requires bringing memory into contact with a complex array of political economic and social forces Demonstrating an ability to explain complex philosophical ideas in language that will be accessible to students and researchers alike in architecture urban studies cultural studies and memory studies this book serves as a thought provoking account of the intertwining of contemporary architecture media and memory *Design & Applied Arts Index* ,2001 *New Books on Women, Gender and Feminism* ,2008 *The Devil, the Lovers, & Me* Kimberlee Auerbach,2007 The author describes her survival of an abusive relationship her mother s mid life sexual proclivities and the interference of friends and her father during a promising new romance challenges that prompted her visit to an atypical tarot card reader **The Architectural Index** ,2000 **Cyberspace** ,2001 The term cyberspace was first penned in 1984 by William Gibson in his science fiction novel Neuromancer However the architectural possibilities of this area of design were being investigated well before the term was popularised and with good reason **Avery Index to Architectural Periodicals** Avery Library,1995 **Architectural Publications Index** ,2003 *Art Index* Alice Maria Dougan,Margaret Furlong,2000 *Arts & Humanities Citation Index* ,2002 **Time for Architecture** Robert Adam,2020-02-24 Using time as a unifying theme this book critically analyses many of the key concepts in modern architecture and urban design such as modernity innovation timelessness and sustainability Drawing on the statements of contemporary architects and with reference to a wide range of sources from history philosophy sociology and anthropology as well as studies in diverse subjects such as science fiction colonialism and archaeology the text provides a new perspective on much of the thinking behind contemporary design In addition it develops original and practical theories on the meanings of modernity the variable ageing of the environment the central role of longevity in sustainability the significance of authenticity in conservation and the relationship between collective memory and tradition **Building Futures** Richard Garber,2023-08-29 BUILDING FUTURES An approach to
