Responding to Hate Crime Chakraborti, Neil, Garland, Jon, 2014-05-21

The policy makers that govern responses to hate crimes and the institutions that research those crimes have up to this point been separate policy makers have not taken research into consideration and researchers have conducted their studies with little reference to policies This book bridges the gap between the two by bringing together internationally renowned hate crime experts from the domains of academia policy making and activism The contributors provide new perspectives on the nature of hate crimes their victims and their perpetrators exploring a range of themes challenges and solutions that have otherwise received little attention The result is a collection of innovative ways of combating hate crime that combines cutting edge research with the latest in professional innovations while remaining accessible to a wide audience

Taboo Issues in Social Science Anthony Walsh, 2020-10-06

This book is an expedition into a number of controversial issues in the social sciences with the intention of challenging the conventional wisdom on those issues While most social science research is interesting and important a fair amount of social science research is thinly disguised advocacy research in which conclusions too often precede inquiries The primary topics are those that the journal Nature described as Taboo In order of the degree of censure the topics are race sex differences intelligence and violence The only way to examine these topics with the social science seal of approval attached is through a strictly environmental lens To bring biological factors to bear on them is politically incorrect and can bring the wrath of the academy down on one's head Although many researchers successfully bring biology into their research on these issues they are said to risk career and reputation for doing so Speech codes stifling free intellectual exchange pervade the ivory tower and an overwhelmingly liberal faculty hell bent on eliminating any vestiges of opposition to their ideology This is unconscionable in an institution that is supposed to value free exchange of all ideas and opinions The current state of academic social science is examined before entering the substantive realm to try to explore how the topics I explore have become protected from any claims of naturalness Because the left rejects the idea of human nature it insists that these things are products of social learning and or social construction and are entirely fluid To maintain this position in light of the huge and exponential successes of the natural sciences the left embraces such frames of reasoning as postmodernism radical relativism multiculturalism and political correctness all of which are examined in this book Also discussed are human nature whiteness studies political temperaments various criminal justice issues and capitalism versus socialism
