Athenian Constitution Aristotle, 2016-09-01 The Athenian Constitution Aristotle Translated by Sir Frederic G Kenyon The Constitution of the Athenians or the Athenian Constitution refers to two texts from Classical antiquity one probably by Aristotle or a student of his the second attributed to Xenophon but not thought to be his work The Aristotelian text is contained in two leaves of a papyrus codex discovered at Oxyrhynchus Egypt in 1879 The other work was traditionally included among the shorter works of Xenophon Now the ancient constitution as it existed before the time of Draco was organized as follows The magistrates were elected according to qualifications of birth and wealth At first they governed for life but subsequently for terms of ten years The first magistrates both in date and in importance were the King the Polemarch and the Archon The earliest of these offices was that of the King which existed from ancestral antiquity To this was added secondly the office of Polemarch on account of some of the kings proving feeble in war for it was on this account that Ion was invited to accept the post on an occasion of pressing need The last of the three offices was that of the Archon which most authorities state to have come into existence in the time of Medon Others assign it to the time of Acastus and adduce as proof the fact that the nine Archons swear to execute their oaths as in the days of Acastus which seems to suggest that it was in his time that the descendants of Codrus retired from the kingship in return for the prerogatives conferred upon the Archon Whichever way it may be the difference in date is small but that it was the last of these magistracies to be created is shown by the fact that the Archon has no part in the ancestral sacrifices as the King and the Polemarch have but exclusively in those of later origin So it is only at a comparatively late date that the office of Archon has become of great importance through the dignity conferred by these later additions The Thesmothetae were many years afterwards when these offices had already become annual with the object that they might publicly record all legal decisions and act as guardians of them with a view to determining the issues between litigants Accordingly their office alone of those which have been mentioned was never of more than annual duration Aristotle and Xenophon on Democracy and Oligarchy John Michael Moore, 1975 Three treatises survive from classical Greece under the loose title *Politeiai* Constitutions which are unique in character and indispensable to any student of the period The longest and most important is Aristotle's Constitution of Athens which is both a history of Athenian constitutional development and a survey of the constitutional machinery of Aristotle's own day The second by Xenophon is an account of the Spartan social and educational system and the third also attributed to Xenophon The Constitution of the Athenians though probably by an earlier author is the first example in history of political pamphleteering Dr Moore has newly translated all three of these documents and an additional fragment The Boeotian Constitution written in the fourth century B C and the only surviving account of a genuinely oligarchic regime of the period To these much needed scholarly translations Dr Moore has added brilliant introductions and commentaries which evaluate the documents illumine their significance and provide the background information which the writers assumed their readers to possess In bringing together translating and annotating these constitutional documents from ancient Greece Dr Moore has

produced an authoritative work of the highest scholarship which will place all students of constitutional history and of the Ancient World in his debt **The Constitution of Athens** Aristotle, 2015 The Constitution of Athens is a thorough description of the political system of that ancient state The treatise was composed between 330 and 322 BC and consists of two parts The first part deals with the different forms of the constitution the second part describes the city's institutions including the terms of access to citizenship magistrates and the courts **The Athenian Constitution** Aristotle, 2019-09-26 The Constitution of the Athenians also called the Athenian Constitution is a work by Aristotle or one of his students The work describes the constitution of Classical Athens commonly called the Aeropagite constitution It was preserved on two leaves of a papyrus codex discovered at Oxyrhynchus Egypt in 1879 **The Development of the Athenian Constitution** George Willis Botsford, 1893
