Final Report on Migrant Salmon Light Guiding Studies (Contract No. D.A.-45-108 CIVENG-63-29) at Columbia River Dams, for the Fisheries Engineering Research Program, U.S. Army Engineer Division, North Pacific Corps of Engineers Paul Eldon Fields, 1966 *Screening the Posthuman* Missy Molloy, Pansy Duncan, Claire Henry, 2023 From AI to climate change, recent technological, ecological, and cultural transformations have unsettled established assumptions about the relationship between the human and the more-than-human world. *Screening the Posthuman* addresses a heterogeneous body of twenty-first-century films that turn to the figure of the posthuman as a means of exploring this development. Through close analyses of films as diverse as *Kikyo* by Hirokazu Koreeda (2009), *Testosterone* by Ildiko Enyedi (2017), and *Nomadland* by Chloé Zhao (2020), this wide-ranging volume shows that while often identified as the remit of science fiction, the posthuman on screen crosses filmic genres, national contexts, and industrial settings. In the process, posthuman cinema emphasizes humanity's entanglement in broader biological, technological, and social worlds and exposes new models of subjectivity, community, and desire. In advancing these arguments, *Screening the Posthuman* draws on scholarship associated with critical posthumanist theory, an ongoing project unified by a decentering of the human. As the first systematic, full-length application of this body of scholarship to cinema, *Screening the Posthuman* advocates for a rigorous posthumanist critique that avoids both humanist nostalgia and transhumanist fantasy in its attention to the excitements and anxieties of posthuman experience.
