A History of Architectural Theory Hanno-Walter Kruft, 1994 Introducing Architectural Theory Korydon Smith, Miguel Guitart, 2013-05-20 This is the most accessible architectural theory book that exists Korydon Smith presents each common architectural subject such as tectonics use and site as though it were a conversation across history between theorists by providing you with the original text a reflective text and a philosophical text He also introduces each chapter by highlighting key ideas and asking you a set of reflective questions so that you can hone your own theory which is essential to both your success in the studio and your adaptability in the profession These primary source texts which are central to your understanding of the discipline were written by such architects as Le Corbusier Robert Venturi and Adrian Forty The appendices also have guides to aid your reading comprehension to help you write descriptively analytically and disputationally and to show you citation styles and how to do library based research More than any other architectural theory book about the great thinkers *Introducing Architectural Theory* teaches you to think as well

Architectural Theory Bernd Evers, 2003 This book charts the fascinating history of architectural theory from the Renaissance to the present day Addressing its subject country by country and featuring over 850 illustrations it offers a chronological overview of the most important architects and architectural theoreticians from Alberti to Koolhaas Book jacket The Contested Territory of Architectural Theory Elie G. Haddad, 2022-10-21

This book brings together a diverse group of theoreticians to explore architectural theory as a discipline assessing its condition and relevance to contemporary practice Offering critical assessment in the face of major social and environmental issues of today 17 original contributions address the relevance of architectural theory in the contemporary world from various perspectives including but not limited to politics gender representation race environmental crisis and history The chapters are grouped into two distinct sections the first section explores various historical perspectives on architectural theory mapping theory's historiographical turn and its emergence and decline from the 1960s to the present the second offers alternative visions and new directions for architectural theory

incorporating feminist and human rights perspectives and addressing contemporary issues such as Artificial Intelligence and the Age of Acceleration This edited collection features contributions from renowned scholars as well as emergent voices with a Foreword by David Leatherbarrow This book will be of great interest to graduate and upper level students of architecture as well as academics and practicing architects **Architectural Humanities in Progress** Bagoes

Wiryomartono,2022-02-02 This monograph brings three branches of philosophy together epistemology ethics and aesthetics It assesses the built environment as a case study from a phenomenological perspective Under the notion of phenomenology this study understands the built environment as the hermeneutical phenomenon of being in the life world that is experienced by people within the socio cultural and historical context of habitation Hermeneutically the built environment as a phenomenon is contextually interwoven with other phenomena within the socio cultural historical and environmental network Phenomenologically speaking the task of the study is to excavate listen to unfold divulge and reconstruct the socio culturally environmentally and historically constructed relationship between people and their built environment that build develop and elaborate the system of knowledge ethics and aesthetics By and large its nature and findings are theoretical and interdisciplinary so it will be of interest not only for philosophers but also to scholars studying urban development and anthropology Building Theories Franca Trubiano,2022-11-25 Building Theories speaks to the value of words in

architecture It addresses the author s fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de M zi res Boull e Laugier Rondelet Semper Viollet le Duc H bsch B tticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect s composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form Architectural System Structures Kasper Sánchez Vibæk,2014-06-20 This book proposes a system structure in architectural design that

conceptualises a systemic level in architecture and construction that lies between general construction techniques and specific architectural results In order to make such a system structure operational the elaboration of a model seeks on the one hand to analytically grasp and on the other hand to make it possible to actively work with system structures as part of architectural design Kasper Sanchez Vibaek's ambition is to bridge an apparent and increasing gap between architectural ideation and the way these ideas are brought to life as real physical manifestations of our built environment In line with the so called systems sciences the book rejects the prevalent scientific view that the degree of detail automatically enhances understanding and explanative power of complex phenomena It establishes the idea of a systems view on buildings and architectural design that through the use of flexible constituent elements facilitates discussion and decision making about how architectural wholes are appropriately put together as assemblages of what the current and future building industry is capable of producing Based on several years of detailed research into the architectural consequences of construction when exposed to industrialised production techniques and systems Architectural System Structures represents a new way to look at what is already there and is useful for all those interested in the processes of architectural creation and realisation specifically attached to time place and cultural context

Architectural Involutions Mimi Yiu, 2015-11-15 Taking the reader on an inward journey from fa ades to closets from physical to psychic space Architectural Involutions offers an alternative genealogy of theater by revealing how innovations in architectural writing and practice transformed an early modern sense of interiority As the English house underwent a process of inward folding replacing a logic of central assembly with one of dissemination the subject who negotiated this new scenography became a flashpoint of conflict in both domestic and theatrical arenas The book launches from a matrix of related platforms a term that in early modern usage denoted scaffolds stages and draftsmen's sketches to situate Alberti Shakespeare Jonson and others within a landscape of spatial and visual change Engaging theory with archival findings Mimi Yiu reveals an emergent desire to perform subjectivity to unfold an interior face to an admiring public

Brill's Companion to the Reception of Vitruvius , 2024-03-18 As a master of his discipline the ancient Roman architect Vitruvius has been read widely for centuries This collection of essays by an international team of experts investigates his influence and reception in ideas artistic forms and building practices from antiquity to modern day The stories of influence told in these pages suggest that it is the unbridgeable gulf between the Vitruvian text and surviving monuments that makes reading the Ten Books so endlessly compelling The contributors to this volume offer their own original readings which are organized into the five sections transmission translation reception practice and Vitruvian topics

The Dissertation Iain Borden, Katerina Rüedi, 2006 This is a comprehensive guide to all that an architectural student might need to know about writing a dissertation It takes the student through starting writing preparing and submitting a dissertation

The Architecture of Jens Fredrick Larson Rod Miller, 2024-08-19 After serving with the Canadian Artillery and becoming an ace with the Royal Flying Corps American Jens Fredrick Larson settled

into architecture At age 28 he began work at Dartmouth As his reputation grew he would go on to work with myriad clients and more than thirty five colleges and universities in America and elsewhere including Colby College Bucknell College Wake Forest University the City University of Paris the University of New Brunswick and the Institute for Advanced Study Princeton This text explores the history of Larson and his career with a look at his major projects and the challenges faced late in his career when a nascent Modernism denigrated and misunderstood the meaning and value of the Georgian style

The Figure of Knowledge Sebastiaan Loosen,Rajesh Heynickx,Hilde Heynen,2020-10-01 It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed such as critical theory critical regionalism deconstructivism and pragmatism Yet the intellectual contours of what constitutes architectural theory have been constantly in flux It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made The contributions in this volume focus on institutional geographical rhetorical and other conditioning factors They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to **The**

Architecture of Address Jake Adam York,2004-05 The Architecture of Address traces the evolution of an American species of lyric capable of public pronouncement without polemic Beginning with Whitman Jake Adam York seeks to describe a kind of poem wherein the most ambitious poets including Hart Crane and Robert Lowell occupy and reconstruct important public spaces This study argues that American poets become civic actors when their poems imagine and reconstruct the conceptual architecture of the monument *An Architecture of Place* Randall S. Lindstrom,2024-06-25 Challenging mainstream

architecture s understandings of place this book offers an illuminating clarification that allows the idea s centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines **School(house) Design and Curriculum in Nineteenth Century America** Joseph da Silva,2018-08-21 This

book examines the formative relationship between nineteenth century American school architecture and curriculum While other studies have queried the intersections of school architecture and curriculum they approach them without consideration for the ways in which their relationships are culturally formative or how they reproduce or resist extant inequities in the United States Da Silva addresses this gap in the school design archive with a cross disciplinary approach taking to task the cultural consequences of the relationship between these two primary elements of teaching and learning in a hotspot of American education the nineteenth century Providing a historical and theoretical framework for practitioners and scholars in evaluating the politics of modern American school design the book holds a mirror to the oft criticized state of American education today

Women, Space and Utopia 1600-1800 Nicole Pohl, 2017-05-15 The first full length study of women s utopian spatial imagination in the seventeenth and eighteenth centuries this book explores the sophisticated correlation between identity and social space The investigation is mainly driven by conceptual questions and thus seeks to link theoretical debates about space gender and utopianism to historiographic debates about the gendered social production of space As Pohl s primary aim is to demonstrate how women writers explore the complex gender politics of space specific attention is given to spaces that feature widely in contemporary utopian imagination Arcadia the palace the convent the harem and the country house The early modern writers Lady Mary Wroth and Margaret Cavendish seek to recreate Paradise in their versions of Eden and Jerusalem the one yearns for Arcadia the other for Solomon s Temple Margaret Cavendish and Mary Astell redefine the convent as an emancipatory space dismissing its symbolic meaning as a confining and surveilled architecture The utopia of the country house in the work of Delarivier Manley Sarah Scott and Mary Hamilton will reveal how women writers resignify the traditional metonym of the country estate The study will finish with an investigation of Oriental tales and travel writing by Ellis Cornelia Knight Lady Mary Montagu Elizabeth Craven and Lady Hester Stanhope who unveil the seraglio as a location for a Western specifically masculine discourse on Orientalism despotism and female sexuality and offers their own utopian judgment

The Imperfect City: On Architectural Judgment Samir Younes, 2016-03-03 If architectural judgment were a city a city of ideas and forms then it is a very imperfect city When architects judge the success or failure of a building the range of ways and criteria which can be used for this evaluation causes many contentious and discordant arguments Proposing that the increase in number and intensity of such arguments threatens to destabilize the very grounds upon which judgment is supposed to rest this book examines architectural judgment in its historical cultural political and psychological dimensions and their convergence on that most expressive part of architecture namely architectural character It stresses the value of reasoned judgment in justifying architectural form a judgment based on three sets of criteria those criteria that are external to architecture those that are internal to architecture and those that pertain to the psychology of the architect as image maker External criteria include philosophies of history or theories of modernity internal criteria include architectural character and architectural composition while the psychological criteria pertain to

mimetic rivalry or rivaling desires for the same architectural forms Yet although architectural conflicts can adversely influence judgment they can at the same time contribute to the advancement of architectural culture **Medieval Allegory and the Building of the New Jerusalem** Ann Raftery Meyer, 2003 The chantry movement in late medieval England is situated in this context and leads to a demonstration of the movement's associations with the highly wrought poem Pearl and its companion poems the book analyses Pearl as medieval architecture offering fresh perspectives on its elaborate construction and historical context BOOK JACKET
