The New Handbook of Research on Music Teaching and Learning Richard Colwell, Carol Richardson, 2002-04-18

Featuring chapters by the world's foremost scholars in music education and cognition this handbook is a convenient collection of current research on music teaching and learning This comprehensive work includes sections on arts advocacy music and medicine teacher education and studio instruction among other subjects making it an essential reference for music education programs The original Handbook of Research on Music Teaching and Learning published in 1992 with the sponsorship of the Music Educators National Conference MENC was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field Choice This new companion volume again with the sponsorship of MENC explores the significant changes in music and arts education that have taken place in the last decade Notably several chapters now incorporate insights from other fields to shed light on multi cultural music education gender issues in music education and non musical outcomes of music education Other chapters offer practical information on maintaining musicians health training music teachers and evaluating music education programs Philosophical issues such as musical cognition the philosophy of research theory curriculum and educating musically are also explored in relationship to policy issues In addition to surveying the literature each chapter considers the significance of the research and provides suggestions for future study Covering a broad range of topics and addressing the issues of music education at all age levels from early childhood to motivation and self regulation this handbook is an invaluable resource for music teachers researchers and scholars

Teaching the Bible in the Church John Bracke, Karen Tye, 2003-01-01 This interdisciplinary conversation combines educational theory with Bible scholarship to help teachers of the Bible move beyond conveying information to revealing the transformative power of the scripture

Basics of Christian Education Karen Tye, 2000-01-01 Congregations are always struggling with what quality Christian education is and how to build and maintain it In this concise and easy to use guide Karen Tye offers practical help addressing the vital areas that need attention when planning for and building a Christian education program Questions and exercises at the end of each chapter help pastors Christian educators seminary students and laity apply the information to their own unique setting building on the basics to renew and transform Christian education

Affect and Legal Education Mrs Caroline Maughan, Professor Paul Maharg, 2013-02-28 The place of emotion in legal education is rarely discussed or analysed and we do not have to seek far for the reasons The difficulty of interdisciplinary research the technicisation of legal education itself the view that affect is irrational and antithetical to core western ideals of rationality all this has made the subject of emotion in legal education invisible Yet the educational literature on emotion proves how essential it is to student learning and to the professional lives of teachers This text the first full length book study of the subject seeks to make emotion a central topic of research for legal educators and restore the power of emotion in our teaching and learning Part 1 focuses on the contribution that

neuroscience can make to legal learning a theme that is carried through other chapters in the book Part 2 explores the role of emotion in the working lives of academics and clinical staff while Part 3 analyses the ways in which emotion can be used in learning and teaching The book interdisciplinary and wide ranging in its reference breaks new ground in its analysis of the educational lifeworld of situations communities actors and interactions in legal education

Contextual Teaching and Learning Elaine B. Johnson, 2002 Contextual teaching and learning CTL is a system for teaching that is grounded in brain research Brain research indicates that we learn best when we see meaning in new tasks and material and we discover meaning when we are able to connect new information with our existing knowledge and experiences Students learn best according to neuroscience when they can connect the content of academic lessons with the context of their own daily lives Johnson discusses the elements of the brain compatible contextual teaching and learning system making meaningful connections investing school work with significance self regulated learning collaboration critical and creating thinking nurturing the individual reaching high standards and using authentic assessment Drawing on the practices of teachers in kindergarten through university Johnson provides numerous examples of how to use each part of the CTL system

Learner-Centered Teaching Terry Doyle, 2023-07-03 This book presents the research based case that Learner Centered Teaching LCT offers the best means to optimize student learning in college and offers examples and ideas for putting it into practice as well the underlying rationale It also starts from the premise that many faculty are much closer to being learner centered teachers than they think but don't have the full conceptual understanding of the process to achieve its full impact There is sometimes a gap between what we would like to achieve in our teaching and the knowledge and strategies needed to make it happen LCT keeps all of the good features of a teacher centered approach and applies them in ways that are in better harmony with how our brains learn It for instance embraces the teacher as expert as well as the appropriate use of lecture while also offering new effective ways to replace practices that don't optimize student learning Neuroscience biology and cognitive science research have made it clear that it is the one who does the work who does the learning Many faculty do too much of the work for their students which results in diminished student learning To enable faculty to navigate this shift Terry Doyle presents an LCT based approach to course design that draws on current brain research on cognition and learning on addressing the affective concerns of students on proven approaches to improve student's comprehension and recall on transitioning from teller of knowledge to a facilitator of learning on the design of authentic assessment strategies such as engaging students in learning experiences that model the real world work they will be asked to do when they graduate and on successful communication techniques The presentation is informed by the questions and concerns raised by faculty from over sixty colleges with whom Terry Doyle has worked and on the response from an equal number of regional national and international conferences at which he has presented on topics related to LCT
