Beijing 2049 Spatial Development Strategy Chinese Edition:

Urban and Regional Development in China Yue-man Yeung, 1993 *Chinese Cities in the 21st Century* Youqin

Huang, 2020-04-03 This book is an interdisciplinary examination of China's new urban development model and the challenges Chinese cities face in the 21st century. China is in the midst of a historic developmental inflection point grappling with a significantly slowing economy, rapidly rising inequality, massive migration, skyrocketing housing prices, alarming environmental problems, and strong pushback from the West. In this volume, Western and Chinese scholars in different disciplines offer the clearest look yet at some of the main challenges China faces, including domestic and international contexts, the new urban development model, inclusion and well-being of migrants and their families, and urban sustainability. This book sheds light on China's ongoing development and future directions and has strong policy implications for anyone interested in the future of China.

China's Urban Champions Kyle A. Jaros, 2019-07-23 An exploration of how key provinces in China shape urban and regional development. The rise of major metropolises across China since the 1990s has been a double-edged sword: although big cities function as economic powerhouses, concentrated urban growth can worsen regional inequalities, governance challenges, and social tensions. Wary of these dangers, China's national leaders have tried to forestall top-heavy urbanization. However, urban and regional development policies at the subnational level have not always followed suit. China's Urban Champions explores the development paths of different provinces and asks why policymakers in many cases favor big cities in a way that reinforces spatial inequalities rather than reducing them. Kyle Jaros combines in-depth case studies of Hunan, Jiangxi, Shaanxi, and Jiangsu provinces with quantitative analysis to shed light on the political drivers of uneven development. Drawing on numerous Chinese language written sources, including government documents and media reports, as well as a wealth of field interviews with officials, policy experts, urban planners, academics, and businesspeople, Jaros shows how provincial development strategies are shaped by both the horizontal relations of competition among different provinces and the vertical relations among different tiers of government. Metropolitan-oriented development strategies advance when lagging economic performance leads provincial leaders to fixate on boosting regional competitiveness, and when provincial governments have the political strength to impose their policy priorities over the objections of other actors. Rethinking the politics of spatial policy in an era of booming growth, China's Urban Champions highlights the key role of provincial units in determining the nation's metropolitan and regional development trajectory.

Land Use Changes and Urban Growth Control in Beijing, China Xuejin Ruan, 2006

Planning for Growth Fulong Wu, 2015-01-09 Planning for Growth Urban and Regional Planning in China provides an overview of the changes in China's planning system policy and practices using concrete examples and informative details in language that is accessible enough for the undergraduate but thoroughly grounded in a wealth of research and academic experience to support academics. It is the first accessible text on changing urban and regional planning in China under the process of transition from a centrally planned socialist economy to an emerging market in the world. Fulong Wu, a leading authority on Chinese cities and urban and regional planning, sets up the historical framework of planning in China including its foundation based on the proactive approach to economic growth, the new forms of planning such as the strategic spatial plan and urban cluster plans that have emerged and stimulated rapid urban expansion and transformed compact Chinese cities into dispersed metropolises. And goes on to explain the new planning practices that began to pay attention to eco cities, new towns and new development areas. Planning for Growth Urban and Regional Planning in China demonstrates that planning is not necessarily an enemy of growth and plays an important role in Chinese urbanization and economic growth. On the other hand, it also shows planning's limitations in achieving a more sustainable and just urban future.

Handbook on Urban Development in China Ray Yep, June Wang, Thomas Johnson, 2019 The trajectory and logic of urban development in post Mao China have been shaped and defined by the contention between domestic and global capital, central and local state and social actors of different class status and endowment. This urban transformation process of historic proportion entails new rules for distribution and negotiation, novel perceptions of citizenship as well as room for unprecedented spontaneity and creativity. Based on original research by leading experts, this book offers an updated and nuanced analysis of the new logic of urban governance and its implications.

The Outline of the Eleventh Five-year Program for the National Economic and Social Development in Beijing, 2006

The Chinese City Weiping Wu, Piper Gaubatz, 2013-05-07 China's cities are home to 10 percent of the world's population today. They display unprecedented dynamism under the country's surging economic power. Their remarkable transformation builds on immense traditions having lived through feudal dynasties, semicolonialism and socialist commands. Studying them offers a lens into both the complex character of the changing city and the Chinese economy, society and environment. This text is anchored in the spatial sciences to offer a comprehensive survey of the evolving urban landscape in China. It is divided into four parts with 13 chapters that can be read together or as stand alone material. Part I sets the context describing the geographical setting, China's historical urban system and traditional urban forms. Part II covers the urban system since 1949, the rural-urban divide and migration and interactions with the global economy. Part III outlines the specific sectors of urban development including economic restructuring, social spatial transformation, urban infrastructure and urban land and housing. Finally, part IV showcases urbanism through the lens of the urban environment, lifestyle and social change and urban governance. The Chinese City offers a critical understanding of China's urbanization, exploring how the complexity of the Chinese city both conforms to and defies conventional urban

theories and experience of cities elsewhere around the world This comprehensive book contains a wealth of up to date statistical information case studies and suggested further reading to demonstrate the diversity of urban life in China The Socio-spatial Transition of Beijing, in Between Communal Space and Associative Space ,2015 Abstract In this research based on socio spatiality as the starting point it has conducted extensive city space analysis to advance a new urban social space theory Resting upon the basis of traditional continent philosophy this social space theory has adopted the structuration methods at the same time trying to build certain combination between theoretical frame work establishment and empirical observations Therefore the socio spatial transition study is neither a macro theory of traditional structuralism nor a typology of urban planning theory or a positivism social geography but an operative theory on practical purpose Firstly what s distinct from the traditional structuralism is that this study examines the endless transiting structural relations not macroscopic narrations of absolute definition and structure In fact any city and space are always co existed in their structural transitional relationship thus research in transition has become the main body of this study And case study is a must for research in transition as part of efforts to apply the structuration concept into practice reason Secondly this study first establishes the fundamental structuration concept of socio spatial transition which as an operative tool is applied to conduct transition analysis on specific case about the City of Beijing Therefore as a social space theory referring to as science remains criticism of traditional continent philosophy However this criticism did not working on the level of ideology or conceptions but on transiting under structural relations keeping it from incompetent ideology criticism of continental critical theory Unfortunately contemporary urban and space development have now gone extremely unbalanced under a background of globalization yet traditional macro theories are incapable of either producing significant impact on practice or helping people identify practical problems While facing general issues particularly the Chinese urban issue category established on a meta structured city mode the micro case study has plunged into dilemma for unknowing either to ask questions or to answer questions Therefore this study is set to identify dilemma and find direction for future relevant research In this dissertation Beijing is used as a model and structuration methods as tools It has extensively analyzed the social spatial transition of the city space of Beijing acquiring brand new knowledge of its urban space development It is helpful to an in depth understanding of the city space development not only in Beijing but also in many other cities that were influenced by the capital model of Beijing Since the start of reform and opening up China has created a unique development mode of the new styled metropolitan and urbanization in history This research is expected to analyze or decode what China s urban development in between communal space and associative space
