Advanced modeling capabilities include linear and logistic regression, neural networks, scorecards and market basket analysis. Unsupervised learning techniques include cluster analysis and principal component analysis.

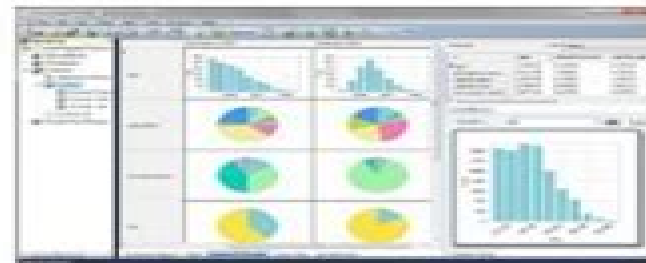

## Data Preparation, Data Profiling and Exploration

Highly intuitive and easy to use wizards help business users and quantitative analysts save time and obtain the knowledge needed.

KnowledgeSTUDIO is based on open standards and facilitates integration with all types of data sources. Data can be imported from Hadoop, R, SAS, SPSS, Text, SQL, Microsoft Excel, and any database system.

KnowledgeSTUDIO includes data preparation capabilities that allow users to easily extract, manipulate and transform data to prepare it for modeling—from within your enterprise data warehouse. Data preparation wizards increase productivity and efficiency and eliminate the need to write code.

Dataset-level and row-level manipulations are performed using wizards to join, append and aggregate datasets—and remove duplicates.

New variables can be defined using standard ANSI SQL expressions through the data editor wizard. Auto-generation of expressions using helpers is available for common tasks such as missing value substitution and optimal binning.
