Congress,1999 Contemporary Perspectives on Science and Technology in Early Childhood Education Olivia Saracho,Bernard Spodek,2008-01-01 For decades politicians businessmen and other leaders have been concerned with the quality of education including early childhood education in the United States While more than 50% of the children between the ages of three and five are enrolled in preschool and kindergarten programs in the United States no state federal or national standards exist for science or technology education in preschool or kindergarten programs Knowledge about science and technology is an important requirement for all in contemporary society An increasing number of professions require the use of scientific concepts and technological skills and society as a whole depends on scientific knowledge Scientific and technological knowledge should be a part of every individual s education There are many ways to enhance young children s scientific thinking and problem solving skills as well as their technological abilities The purpose of this volume is to present a critical analysis of reviews of research on science and technology education in early childhood education The first part of the volume includes contributions by leading scholars in science while the second part includes contributions by leading scholars in technology **The Microcomputer Facility and the School Library Media Specialist** Blanche Woolls,David V. Camuse,1984 Understanding, Dismantling, and Disrupting the Prison-to-School Pipeline Kenneth J. Fasching-Varner,Lori Latrice Martin,Roland W. Mitchell,Karen Bennett-Haron,Arash Daneshzadeh,2016-12-06 This volume examines the school to prison pipeline a concept that has received growing attention over the past 10 15 years in the United States The pipeline refers to a number of interrelated concepts and activities that most often include the criminalization of students and student behavior the police like state

found in many schools throughout the country and the introduction of youth into the criminal justice system at an early age. The school to prison pipeline negatively and disproportionately affects communities of color throughout the United States, particularly in urban areas. Given the demographic composition of public schools in the United States, the nature of student performance in schools over the past 50 years, the manifestation of school to prison pipeline approaches pervasive throughout the country and the world, and the growing incarceration rates for youth, this volume explores this issue from the sociological, criminological, and educational perspectives. Understanding Dismantling and Disrupting the Prison to School Pipeline has contributions from scholars and practitioners who work in the fields of sociology, counseling, criminal justice, and who are working to dismantle the pipeline. While the academic conversation has consistently called the pipeline school to prison, including the framing of many chapters in this book, the economic and market forces driving the prison industrial complex urge us to consider reframing the pipeline as one working from prison to school. This volume points toward the tensions between efforts to articulate values of democratic education and schooling against practices that criminalize youth and engage students in reductionist and legalistic manners.
