The Oxford Handbook of Science

Fiction Rob Latham, 2014 The Oxford Handbook of Science Fiction attempts to describe the historical and cultural contours of SF in the wake of technoculture studies Rather than treating the genre as an isolated aesthetic formation it examines SF's many lines of cross pollination with technocultural realities since its inception in the nineteenth century showing how SF's unique history and subcultural identity has been constructed in ongoing dialogue with popular discourses of science and technology The volume consists of four broadly themed sections each divided into eleven chapters Section I Science Fiction as Genre considers the internal history of SF literature examining its characteristic aesthetic and ideological modalities its animating social and commercial institutions and its relationship to other fantastic genres Section II Science Fiction as Medium presents a more diverse and ramified understanding of what constitutes the field as a mode of artistic and pop cultural expression canvassing extra literary manifestations of SF ranging from film and television to videogames and hypertext to music and theme parks Section III Science Fiction as Culture examines the genre in relation to cultural issues and contexts that have influenced it and been influenced by it in turn the goal being to see how SF has helped to constitute and define important sub cultural groupings social movements and historical developments during the nineteenth twentieth and twenty first centuries Finally Section IV Science Fiction as Worldview explores SF as a mode of thought and its intersection with other philosophies and large scale perspectives on the world from the Enlightenment to the present day

Slices & Lumps Lee Anne Fennell, 2019-09-16 How things are divided up or pieced together matters Half a bridge is of no use at all Conversely many things would do more good if they could be divided up differently Perhaps you would prefer a job that involves a third less work and a third less pay or a car that materializes only when needed and is priced accordingly Difficulties in slicing and lumping shape nearly every facet of how we live and work and a great deal of law and policy as well Lee Anne Fennell explores how both types of challenges carving out useful slices and assembling useful lumps surface in myriad contexts from hot button issues like conservation and eminent domain to developments in the sharing economy to personal struggles over work money time diet and exercise Yet the significance of configuration is often overlooked leading to missed opportunities for improving our lives With a technology fueled entrepreneurial explosion underway that is dividing goods services and jobs in novel ways and as urbanization and environmental threats raise the stakes for assembling resources and cooperation this is an especially exciting and crucial time to confront questions of slicing and lumping The future of the city the workplace the marketplace and the environment all turn on matters of configuration as do the prospects for more effective legal doctrines for better management of finances and health and more This book reveals configuration's power and potential as a unifying concept and as a focus of public and private innovation
