

Adding and subtracting fractions with the same denominator

Adding and subtracting fractions is easier than you think!

Imagine you have $\frac{2}{6}$ of a pizza.

Then someone gives you $\frac{3}{6}$ of a pizza.
Now you have $\frac{5}{6}$ of a pizza.

When adding two fractions whose denominators (bottom numbers) are the same, you simply add the two numerators (top numbers) and leave the denominators the same. So, the above diagram can be shown like this:

$$\frac{2}{6} + \frac{3}{6} = \frac{5}{6}$$

Work out these fraction additions:

$$\frac{1}{4} + \frac{2}{4} = \boxed{\text{—}}$$

$$\frac{5}{6} + \frac{1}{6} = \boxed{\text{—}}$$

$$\frac{1}{10} + \frac{2}{10} = \boxed{\text{—}}$$

$$\frac{3}{5} + \frac{1}{5} = \boxed{\text{—}}$$

$$\frac{2}{7} + \frac{4}{7} = \boxed{\text{—}}$$

$$\frac{7}{9} + \frac{1}{9} = \boxed{\text{—}}$$

$$\frac{1}{5} + \frac{2}{5} = \boxed{\text{—}}$$

$$\frac{3}{8} + \frac{2}{8} = \boxed{\text{—}}$$

$$\frac{1}{8} + \frac{4}{8} = \boxed{\text{—}}$$

$$\frac{5}{10} + \frac{3}{10} = \boxed{\text{—}}$$

$$\frac{3}{8} + \frac{2}{8} = \boxed{\text{—}}$$

$$\frac{1}{4} + \frac{3}{4} = \boxed{\text{—}}$$

Answers (left to right): $\frac{3}{4}$, $\frac{6}{6}$, $\frac{3}{10}$, $\frac{4}{5}$, $\frac{6}{7}$, $\frac{8}{9}$, $\frac{3}{5}$, $\frac{5}{8}$, $\frac{5}{8}$, $\frac{8}{10}$, $\frac{5}{8}$, $\frac{4}{4}$.

Learning Bob Sornson, 2014-04-01 The ultimate resource for establishing a solid foundation for mathematical proficiency Essential Math Skills provides hundreds of engaging easy to implement activities and practical assessment tools This standards and research based resource identifies the core math skills that must be measured at each grade level in Pre K through third grade Teachers can easily identify the skills from earlier grades that may need reteaching as well as appropriate activities for students who are ready to tackle higher level skills Students build confidence as they develop deep understanding and successfully advance through the skills The creative strategies presented for teaching each skill include the use of manipulatives visual motor activities exploration inquiry and play When they experience success with these fun tasks students can't help but fall in love with math The Work of Mathematics Teacher Educators Kathleen Lynch-Davis, Robin L. Rider, 2015-10-01 Originally published in 2005 A major focus of teacher education is the development of preservice teachers However it should not be the only focus of those who work in teacher education Educating inservice teachers is equally important and the conversation among those involved in mathematics teacher education needs to include discussion of this group as well This conversation also highlights a need for professional development for teacher educators and research on the development of teacher educators This monograph discusses issues in educating all of these groups of individuals in an effort to continue the conversation among those involved in mathematics teacher education *Visible Learning for Mathematics, Grades K-12* John Hattie, Douglas Fisher, Nancy Frey, Linda M. Gojak, Sara Delano Moore, William Mellman, 2016-09-15 Rich tasks collaborative work number talks problem based learning direct instruction with so many possible approaches how do we know which ones work the best In *Visible Learning for Mathematics* six acclaimed educators assert it's not about which one it's about when and show you how to design high impact instruction so all students demonstrate more than a year's worth of mathematics learning for a year spent in school That's a high bar but with the amazing K-12 framework here you choose the right approach at the right time depending upon where learners are within three phases of learning surface deep and transfer This results in visible learning because the effect is tangible The

framework is forged out of current research in mathematics combined with John Hattie's synthesis of more than 15 years of education research involving 300 million students Chapter by chapter and equipped with video clips planning tools rubrics and templates you get the inside track on which instructional strategies to use at each phase of the learning cycle Surface learning phase When through carefully constructed experiences students explore new concepts and make connections to procedural skills and vocabulary that give shape to developing conceptual understandings Deep learning phase When through the solving of rich high cognitive tasks and rigorous discussion students make connections among conceptual ideas form mathematical generalizations and apply and practice procedural skills with fluency Transfer phase When students can independently think through more complex mathematics and can plan investigate and elaborate as they apply what they know to new mathematical situations To equip students for higher level mathematics learning we have to be clear about where students are where they need to go and what it looks like when they get there Visible Learning for Math brings about powerful precision teaching for K 12 through intentionally designed guided collaborative and independent learning *How Big is a Big Number?* Paul Killen, Sarah Hindhaugh, 2018-01-15 This book examines what is meant by mastery of mathematics and reviews what we can learn from Asian maths teaching methods It helps readers to see how areas of mathematics fit together and how they can support children to build their own understanding of the subject **Fractions in Realistic**

Benchmarks for Science Literacy American Association for the Advancement of Science, 1994-01-06 Published to glowing praise in 1990 Science for All Americans defined the science literate American describing the knowledge skills and attitudes all students should retain from their learning experience and offered a series of recommendations for reforming our system of education in science mathematics and technology Benchmarks for Science Literacy takes this one step further Created in close consultation with a cross section of American teachers administrators and scientists Benchmarks elaborates on the recommendations to provide guidelines for what all students should know and be able to do in science mathematics and technology by the end of grades 2 5 8 and 12 These grade levels offer reasonable checkpoints for student progress toward science literacy but do not suggest a rigid formula for teaching Benchmarks is not a proposed curriculum nor is it a plan for one it is a tool educators can use as they design curricula that fit their student's needs and meet the goals first outlined in Science for All Americans Far from pressing for a single educational program Project 2061 advocates a reform strategy that will lead to more curriculum diversity than is common today IBenchmarks emerged from the work of six diverse school district teams who were asked to rethink the K 12 curriculum and outline alternative ways of achieving science literacy for all students These teams based their work on published research and the continuing advice of prominent educators as well as their own teaching experience Focusing on the understanding and interconnection of key concepts

rather than rote memorization of terms and isolated facts Benchmarks advocates building a lasting understanding of science and related fields In a culture increasingly pervaded by science mathematics and technology science literacy require habits of mind that will enable citizens to understand the world around them make some sense of new technologies as they emerge and grow and deal sensibly with problems that involve evidence numbers patterns logical arguments and technology as well as the relationship of these disciplines to the arts humanities and vocational sciences making science literacy relevant to all students regardless of their career paths If Americans are to participate in a world shaped by modern science and mathematics a world where technological know how will offer the keys to economic and political stability in the twenty first century education in these areas must become one of the nation s highest priorities Together with Science for All Americans Benchmarks for Science Literacy offers a bold new agenda for the future of science education in this country one that is certain to prepare our children for life in the twenty first century
