Planning After Petroleum Jago Dodson, Neil Sipe, Anitra Nelson, 2016-10-04

The past decade has been one of the most volatile periods in global petroleum markets in living memory and future oil supply security and price levels remain highly uncertain. This poses many questions for the professional activities of planners and urbanists because contemporary cities are highly dependent on petroleum as a transport fuel. How will oil dependent cities respond and adapt to the changing pattern of petroleum supplies? What key strategies should planners and policy makers implement in petroleum vulnerable cities to address the challenges of moving beyond oil? How might a shift away from petroleum provide opportunities to improve or remake cities for the economic, social and environmental imperatives of twenty first century sustainability? Such questions are the focus of contributors to this book with perspectives ranging across the planning challenge: overarching petroleum futures governance; transition and climate change questions; the role of various urban transport nodes and household responses; ways of measuring oil vulnerability and the effects on telecommunications, ports and other urban infrastructure. This comprehensive volume with contributions from and focusing on cities in Australia, the UK, the US, France, Germany, the Netherlands and South Korea provides key insights to enable cities to plan for the age beyond petroleum.

Post-crisis Fiscal Policy Carlo Cottarelli, Philip Gerson, Abdelhak Senhadji, A. Senhadji

Semlali, 2014-06-27 Fiscal policy makers have faced an extraordinarily challenging environment over the last few years. At the outset of the global financial crisis the International Monetary Fund (IMF) for the first time advocated a fiscal expansion across all countries able to afford it, a seeming departure from the long held consensus among economists that monetary policy rather than fiscal policy was the appropriate response to fluctuations in economic activity. Since then the IMF has emphasized that the speed of fiscal adjustment should be determined by the specific circumstances in each country. Its recommendation that deficit reduction proceed steadily but gradually positions the IMF between the fiscal doves who argue for postponing fiscal adjustment altogether and the fiscal hawks who argue for a front loaded adjustment. This volume brings together the analysis underpinning the IMF's position on the evolving role of fiscal policy. After establishing its analytical foundation with chapters on such topics as fiscal risk and debt dynamics, the book analyzes the buildup of fiscal vulnerabilities before the crisis, presents the policy response during the crisis, discusses the fiscal outlook and policy challenges ahead and offers lessons learned from the crisis and its aftermath. Topics discussed include a historical view of debt accumulation, the timing, size and composition of fiscal stimulus packages in advanced and emerging economies, the heated debate surrounding the size of fiscal multipliers and the effectiveness of fiscal policy as a countercyclical tool, coordination of fiscal and monetary policies, the sovereign debt crisis in Europe and institutional reform aimed at fostering
