Living Brian C. Wilson, 2014-09-18 A biography of the physician and health guru examining his views on science and medicine as he evolved religiously Purveyors of spiritualized medicine have been legion in American religious history but few have achieved the superstar status of Dr John Harvey Kellogg and his Battle Creek Sanitarium In its heyday the San was a combination spa and Mayo Clinic Founded in 1866 under the auspices of the Seventh day Adventist Church and presided over by the charismatic Dr Kellogg it catered to many well heeled health seekers including Henry Ford John D Rockefeller and Presidents Taft and Harding It also supported a hospital research facilities a medical school a nursing school several health food companies and a publishing house dedicated to producing materials on health and wellness Rather than focusing on Kellogg as the eccentric creator of corn flakes or a megalomaniacal quack Brian C Wilson takes his role as a physician and a theological innovator seriously and places his religion of Biologic Living in an on going tradition of sacred health and wellness With the fascinating and unlikely story of the San as a backdrop Wilson traces the development of this theology of physiology from its roots in antebellum health reform and Seventh day Adventism to its ultimate accommodation of genetics and eugenics in the Progressive Era A well researched biography that seeks to restore the reputation of the doctor satirized in T C Boyle's novel *The Road to Wellville* and in the film of the same name Wilson has done much more than provide a sympathetic biography of the man who headed the once famous Battle Creek Sanitarium There's much here to interest both adherents to and skeptics of today's alternative and holistic medicines as well as fans of American history especially the history of religions Kirkus Reviews While he may look like a certain Kentucky Fried Colonel Kellogg was an early advocate of a vegan diet and the intriguing figure behind the famous Battle Creek Sanitarium that paved the way for many contemporary ideas of holistic health and wellness Wilson's lively and accessible writing introduces readers to spiritualism millennialism the temperance and social purity movements Swedenborgians and Mormons A thought provoking portrait of a charismatic intelligent medical doctor who never stopped absorbing new information and honing his theories even when he was faced with disfellowship from his church and ostracism by friends and colleagues ForeWord Reviews Wilson does an admirable job of portraying how the doctor's beliefs shifted and adapted over time Readers with a keen interest in religious history particularly as it relates to health care will enjoy this biography the most Library Journal *Eponyms in Surgery and*

Anesthesia for Renal Transplantation Gwendolyn B. Graybar, Lois L. Bready, 2012-12-06 This treatise commemorates the 32nd anniversary of the first successful allogenic kidney transplant in a human being and the beginning of a continuing challenge for well over a generation of anesthesiologists If comparisons can be permitted this epoch making event can be ranked with the first pulmonary lobectomy and subsequently the initial ligation of a patent ductus arteriosus in the late 1930s when thoracic and cardiac surgery began Was it merely a coincidence that brought these events to the fore so close upon one another after many years of ideation and frustration Not so according to Lewis Thomas for this was the time of medicine's second revolution its transformation from an empirical art into a powerfully effective science The remote Galenic conception of disease with its emphasis on disturbed body humors was about to be supplanted by effective therapeutics as signified by the introduction of the sulfonamides and antibiotics for the specific treatment of infection Anesthesiology had been dormant up to that era still relying upon a few agents more or less utilized from the beginning and purveyed by a handful of specialists who had not yet begun to ask the scientific questions necessary for their maturation into a bona fide discipline However anesthesiology was inevitably caught in the ferment for as Peter Caws observed It serves to remind us that the development of science is a step wise process nobody starts from scratch and nobody gets very far ahead of the rest [Surgery and life](#)

Landecker,2010-03-30 How did cells make the journey one we take so much for granted from their origin in living bodies to something that can be grown and manipulated on artificial media in the laboratory a substantial biomass living outside a human body plant or animal This is the question at the heart of Hannah Landecker s book She shows how cell culture changed the way we think about such central questions of the human condition as individuality hybridity and even immortality and asks what it means that we can remove cells from the spatial and temporal constraints of the body and harness them to human intention Rather than focus on single discrete biotechnologies and their stories embryonic stem cells transgenic animals Landecker documents and explores the wider genre of technique behind artificial forms of cellular life She traces the lab culture common to all those stories asking where it came from and what it means to our understanding of life technology and the increasingly blurry boundary between them The technical culture of cells has transformed the meaning of the term biological as life becomes disembodied distributed widely in space and time Once we have a more specific grasp on how altering biology changes what it is to be biological Landecker argues we may be more prepared to answer the social questions that biotechnology is raising *Greater Than the Parts* Christopher Lawrence,George Weisz,1998 This book sheds new light on orthodox medicine and medical science in the interwar years It challenges the accepted story that medicine in the twentieth century was subject to icreasing reductionism and shows instead that there was a holistic turn in the medical sciences and clinical practice that challenged reductionism and medical specialization
