Mathematical Modeling in Economics and Finance: Probability, Stochastic Processes, and Differential Equations

Steven R. Dunbar, 2019-04-03 Mathematical Modeling in Economics and Finance is designed as a textbook for an upper division course on modeling in the economic sciences The emphasis throughout is on the modeling process including post modeling analysis and criticism It is a textbook on modeling that happens to focus on financial instruments for the management of economic risk The book combines a study of mathematical modeling with exposure to the tools of probability theory difference and differential equations numerical simulation data analysis and mathematical analysis Students taking a course from Mathematical Modeling in Economics and Finance will come to understand some basic stochastic processes and the solutions to stochastic differential equations They will understand how to use those tools to model the management of financial risk They will gain a deep appreciation for the modeling process and learn methods of testing and evaluation driven by data The reader of this book will be successfully positioned for an entry level position in the financial services industry or for beginning graduate study in finance economics or actuarial science The exposition in Mathematical Modeling in Economics and Finance is crystal clear and very student friendly The many exercises are extremely well designed Steven Dunbar is Professor Emeritus of Mathematics at the University of Nebraska and he has won both university wide and MAA prizes for extraordinary teaching Dunbar served as Director of the MAA s American Mathematics Competitions from 2004 until 2015 His ability to communicate mathematics is on full display in this approachable innovative text

Business Economics And Financial Analysis Dr. Kathi Leela, 2022-01-04 The book is titled Business Economics and Financial Analysis The book helps those who are interested in understanding the basic concepts in the subject of Business Economics and Finance This book is beneficial for students undergoing B E B Tech M E M Tech and related professional courses The book has five chapters covering all topics as per the JNTU syllabus In each chapter concepts have been in simple language with relevant examples

Mathematical Modelling and Numerical Methods in Finance

Alain Bensoussan, Qiang Zhang, 2009-06-16 Mathematical finance is a prolific scientific domain in which there exists a particular characteristic of developing both advanced theories and practical techniques simultaneously Mathematical Modelling and Numerical Methods in Finance addresses the three most important aspects in the field mathematical models computational methods and applications and provides a solid overview of major new ideas and results in the three domains Coverage of all aspects of quantitative finance including models computational
