Cori Knudten, Maren Bzdek, 2020-07-02 Encompassing nearly seven thousand acres amid the woodlands of the Sangre de Cristo Mountains in northern New Mexico the land that is now Pecos National Historical Park has witnessed thousands of years of cultural history stretching back to the Native peoples who long ago inhabited the pueblos of Pecos then known as Cicuye Once a trading center where Pueblo Indians Spanish soldiers and settlers and Plains Indians encountered one another not always peacefully Pecos was a stop on the Santa Fe Trail in the early 1800s and later on the first railroad in New Mexico It was the site of a critical Civil War battle and in the twentieth century became a tourist destination This book tells the story of how over five centuries cultures and peoples converged at Pecos and transformed its environment ultimately shaping the landscape that greets park visitors today Spanning the period from 1540 when Spaniards first arrived into the twenty first century Crossroads of Change focuses on the history of the natural and historic resources Pecos National Historical Park now protects and interprets the ruins of Pecos Pueblo and a Spanish mission church a stage stop along the Santa Fe Trail the Civil War battlefield of Glorieta Pass a twentieth century cattle ranch and the national park itself In an engaging style authors Cori Knudten and Maren Bzdek detail the transformations of Pecos over time often driven by the collision of different cultures such as that between the Franciscan friars and Pecos Indians in the seventeenth century and by the introduction of new animals crops and agricultural practices but also by the natural forces of fire drought and erosion Located on a natural trade route Pecos has long served as a portal between different cultures and environments Documenting this transformation over the ages Crossroads of Change also perhaps shows us Pecos National Historical Park as a portal to the future

The Defoliation of America Amy Marie Hay, 2021-12-14 In *The Defoliation of America* Amy M Hay profiles the attitudes understandings and motivations of grassroots activists who rose to fight the use of phenoxy herbicides commonly known as the Agent Orange chemicals in various aspects of American life during the post WWII era First introduced in 1946 these chemicals mimic hormones in broadleaf plants causing them to essentially grow to death while grass grains and other monocots remain unaffected By the 1950s millions of pounds of chemicals were produced annually for use in brush control weed eradication other agricultural applications and forest management The herbicides allowed suburban lawns to take root and become iconic symbols of success in American life The production and application of phenoxy defoliants continued to skyrocket in subsequent years encouraged by market forces and unimpeded by regulatory oversight By the late 1950s however pockets of skepticism and resistance had begun to appear The trend picked up steam after 1962 when Rachel Carson's *Silent Spring* directed mainstream attention to the harm modern chemicals were causing in the natural world But it wasn't until the Vietnam War when nearly 40 million gallons of Agent Orange and related herbicides were sprayed to clear the canopy and destroy crops in Southeast Asia that the long term damage associated with this group of chemicals began to attract widespread attention and alarm Using a wide array of sources and an interdisciplinary approach *The Defoliation of America* is organized in three parts Part 1 1945-70 examines the development use and responses to the new chemicals used

to control weeds and remove jungle growth As the herbicides became militarized critics increasingly expressed concerns about defoliation in protests over US imperialism in Southeast Asia Part 2 1965 85 profiles three different women who influenced by Rachel Carson challenged the uses of the herbicides in the American West affecting US chemical policy and regulations in the process Part 3 1970 95 revisits the impact and legacies of defoliant use after the Vietnam War From countercultural containment and Nixon s declaration of the War on Drugs to the toxic effects on American and Vietnamese veterans civilians and their children it became increasingly obvious that American herbicides damaged far more than forest canopies With sensitivity to the role gender played in these various protests Hay s study of the scientists health and environmental activists and veterans who fought US chemical regulatory policies and practices reveals the mechanisms obligations and constraints of state and scientific authority in midcentury America Hay also shows how these disparate and mostly forgotten citizen groups challenged the political consensus and were able to shift government and industry narratives of chemical safety
