Exploring the Autobiography as a Genre and a Data Collection Tool Nadia Abid,Elena Bonta,2023-09-07 This book provides researchers and teachers of different disciplines such as literature cultural studies and applied linguistics with a deeper understanding of the autobiography both as a genre and a data collection method The book presents a variety of forms of autobiographies produced in varied fields including confessional poems politicians autobiographies and autobiographical novels Unique among these autobiographies are those that were produced in the field of education namely foreign language education The richness of the studies reported in the chapters lies in the wide variety of qualitative and quantitative analytical tools borrowed from different disciplines mainly applied linguistics and ethnography The book features conceptual metaphor analysis appraisal theory multimodality analysis generic analysis and content analysis **The Lever of Riches** Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major

inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential *Pure Fire* Christopher B. Strain, 2005 In this study of self defense as it was debated and practiced during the civil rights era the decision to defend oneself and family is reframed in terms of a daily concern for many African Americans who faced the continual menace of white aggression Simultaneous *The Autobiography of Malcolm X* Malcolm X, 1965 Encyclopedia of African American History, 1896 to the Present Paul Finkelman, 2009 Alphabetically arranged entries from A to C that explores significant events major persons organizations and political and social movements in African American history from 1896 to the twenty first century
