The American Class Structure in an Age of Growing Inequality Dennis Gilbert, 2008 Why is social inequality in America increasing This text answers this question through a discussion of nine key variables and the best historical and

The Impact of Occupational Dislocation Patricia Kasari, 1999 This study broadens our knowledge of the relationship between occupational prestige family composition and migratory patterns of American Indians at the close of the twentieth century Findings suggest that although many urban Indians work in fields that offer little prestige reservation Indians are even more likely to have undesirable jobs due primarily to low educational attainment gender affiliation and familial

responsibilities **The Structure of Schooling** Richard Arum, Irene R. Beattie, Karly Ford, 2015 This comprehensive reader in the sociology of education examines important topics and exposes students to examples of sociological research on schools Drawing from classic and contemporary scholarship the editors have chosen readings that examine current issues and reflect diverse theoretical approaches to studying the effects of schooling on individuals and society Network

Persistence and the Axis of Hierarchy Steven Rytina, 2020-04-30 *Network Persistence and the Axis of Hierarchy* shows how networks modestly redefined as a strong yet imperfect tendency for pairings to recur day after day that is stickiness imply a singular axis of stratification This is contrary to the nearly universal insistence that stratification is multidimensional

Reanalysis of three central mobility data sets sustains the novel claim Network concepts provide a supple base for analysis whereby order and regularity are strongly sustained in network neighborhoods but are not necessarily uniform or universal This provides new takes often quite radical on accounts of structure and order by authors such as Pierre Bourdieu Randall Collins and Talcott Parsons Handbook of Statistical Modeling for the Social and Behavioral Sciences G. Arminger, Clifford C. Clogg, M.E. Sobel, 1995 Contributors thoroughly survey the most important statistical models used in empirical research in the social and behavioral sciences Following a common format each chapter introduces a model illustrates the types of problems and data for which the model is best used provides numerous examples that draw upon familiar models or procedures and includes material on software that can be used to estimate the models studied This handbook will aid researchers methodologists graduate students and statisticians to understand and resolve common modeling problems

Manpower Administration, **Manpower Research Projects** United States. Department of Labor. Manpower Administration, 1974 **The Routledge History of Irish America** Cian T. McMahon, Kathleen P. Costello-Sullivan, 2024-07-23 This volume gathers over 40 world class scholars to explore the dynamics that have shaped the Irish experience in America from the seventeenth to the twenty first centuries From the early 1600s to the present over 10 million Irish people emigrated to various points around the globe Of them more than six million settled in what we now call the United States of America Some were emigrants some were exiles and some were refugees but they all brought with them habits ideas and beliefs from Ireland which played a role in shaping their new home Organized chronologically the chapters in this volume offer a cogent blend of historical perspectives from the pens of some of the world's leading scholars Each section explores multiple themes including gender race identity class work religion and politics This book also offers essays that examine the literary and or artistic production of each era These studies investigate not only how Irish America saw itself or in turn was seen but also how the historical moment influenced cultural representation It demonstrates the ways in which Irish Americans have connected with other groups such as African Americans and Native Americans and sets Irish America in the context of the global Irish diaspora This book will be of value to undergraduate and graduate students as well as instructors and scholars interested in American History Immigration History Irish Studies and Ethnic Studies more broadly Religion, Work, and Inequality Lisa Keister, 2002-04-17 Work behaviours and inequality in work based rewards are essential to financial security and general well being Although the benefits of receiving work based rewards such as income benefits and retirement packages are significant they are not enjoyed uniformly This title articulates an agenda for better understanding these social processes **Persistence, Privilege, and Parenting** Timothy Smeeding, Robert Erikson, Markus Jäntti, 2011-09-01 Americans like to believe that theirs is the land of opportunity but the hard facts are that children born into poor families in the United States tend to stay poor

and children born into wealthy families generally stay rich Other countries have shown more success at lessening the effects of inequality on mobility possibly by making public investments in education health and family well being that offset the private advantages of the wealthy What can the United States learn from these other countries about how to provide children from disadvantaged backgrounds an equal chance in life Making comparisons across ten countries Persistence Privilege and Parenting brings together a team of eminent international scholars to examine why advantage and disadvantage persist across generations The book sheds light on how the social and economic mobility of children differs within and across countries and the impact private family resources public policies and social institutions may have on mobility In what ways do parents pass advantage or disadvantage on to their children Persistence Privilege and Parenting is an expansive exploration of the relationship between parental socioeconomic status and background and the outcomes of their grown children The authors also address the impact of education and parental financial assistance on mobility Contributors Miles Corak Lori Curtis and Shelley Phipps look at how family economic background influences the outcomes of adult children in the United States and Canada They find that despite many cultural similarities between the two countries Canada has three times the rate of intergenerational mobility as the United States possibly because Canada makes more public investments in its labor market health care and family programs Jo Blanden and her colleagues explore a number of factors affecting how advantage is transmitted between parents and children in the United States and the United Kingdom including education occupation marriage and health They find that despite the two nations having similar rates of intergenerational mobility and social inequality lack of educational opportunity plays a greater role in limiting U S mobility while the United Kingdom's deeply rooted social class structure makes it difficult for the disadvantaged to transcend their circumstances Jane Waldfogel and Elizabeth Washbrook examine cognitive and behavioral school readiness across income groups and find that pre school age children in both the United States and Britain show substantial income related gaps in school readiness driven in part by poorly developed parenting skills among overburdened low income families The authors suggest that the most encouraging policies focus on both school and home interventions including such measures as increases in federal funding for Head Start programs in the United States raising pre school staff qualifications in Britain and parenting programs in both countries A significant step forward in the study of intergenerational mobility Persistence Privilege and Parenting demonstrates that the transmission of advantage or disadvantage from one generation to the next varies widely from country to country This striking finding is a particular cause for concern in the United States where the persistence of disadvantage remains stubbornly high But it provides a reason to hope that by better understanding mobility across the generations abroad we can find ways to do better at home
