**From Illness to Fulfillness** Andy Bertrand, 2021-08-09 This book shares my personal story about being diagnosed with cancer and overcoming it. As a cancer survivor, I know that the best person to write a book about defeating the disease is someone who has battled it himself. If you have cancer, your journey may be very similar to my own. The medications, doctors' visits, and the emotions might be somewhat similar, but our experiences are probably different. Having ventured through this challenging time, the importance of sharing our awareness about moving past cancer lends itself to an engaging new intention of life. The book discusses the eight stages of a cancer treatment and the subsequent personal transformation that ensues. Upon recognizing the similarities of the two processes, you will be surprised at how you manage to follow through with them subconsciously. The quality of your life depends on how you respond to the situations and circumstances you find yourself in. It was a rough ride, but you persevered over cancer. Would you not prefer smoother sailing from here on? How can you rectify the remaining years of your life? *From Illness to Fulfillness* can be the beacon that guides your voyage into a promising future. In the book, you will learn how overcoming cancer instills a new perspective on life. The eight stages of a cancer treatment and transformational change. The importance of personal strengths and interests. Acceptance is the key to moving forward in life. Keep believing, no more tumors, just healthier tomorrows.

Given a less-than-ideal five-year prognosis for surviving an aggressive breast cancer, Dalene Entenmann celebrated her ten-year cancer survivor anniversary with the publication of *22 Ideas for Coping with Cancer*. While the medical team was excellent in their fields of expertise, she quickly realized no one offered any information for treatment or healing beyond the body. From the beginning of her cancer diagnosis, she decided to take an active role in her healing and felt alternative therapies combined with mainstream medicine referred to as integrative.

therapies gave her the best chance for surviving cancer and thriving as a cancer survivor As one reader stated in their review of the guide Your 22 ideas are wonderful For well being and a good life I think everyone should read this cancer or not

bones prior to the operation and that cancer is inoperable and incurable But some people in that condition die very early while others like me live much longer This is highly unpredictable in individual cases due to variation in patient condition treatment effectiveness and other unknowns More than half of all people newly diagnosed with cancer will be cured or given extended remission They will die of something else Of the other half a large number have treatable cancer and they still have many years to live The remainder probably including me have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be killed or removed and death is likely in the next few months or years Nevertheless normally incurable cancer and conventional predictability sometimes fail and others may prolong life by fighting with strong mental and physical effort As the disease progresses and is treated and science advances sometimes in great leaps we are rarely sure of which group we are in That uncertainty that hope and the dreadful power of cancer call for great strength of character and effort in both patients and those around them This book is about that The animal instinct to survive is in humans alone expanded in our unique cortex to something much greater the intelligent understanding of self awareness and an intense desire to prolong the experience growth and emotion of life The human spirit beyond the mere motivation of existence is largely responsible for all that our species has conquered and achieved It is an essential quality to be trained treasured and put to use and one of the finest ways is to survive continue and improve our exceptional life through our collective and individual intellect In the last century medical science the visibility of living in distant years and the recognition that we are and can be responsible for increasing our own longevity have ad
