Clinical Assessment of Children and Adolescents Nuria de la Osa, Miguel Á. Carrasco, 2024-08-12. Up-to-date information on successfully assessing children and adolescents in clinical settings. This book showcases state-of-the-art assessment methods, instruments, and processes in the clinical assessment of children and adolescents. Written by leading experts, the book highlights skills and specific procedures that are relevant and distinctive for the assessment of different age groups and in different contexts so that professionals can plan interventions effectively. After an introduction to the basic concepts and approaches to the clinical assessment of children and adolescents, four further sections explore the diagnosis of psychological problems, the conceptualization of clinical problems and interventions, the assessment of intervention progress and outcomes, and the assessment of specific groups and in special contexts. The contributions are full of practical examples to address issues such as clinical judgement and bias, results integration, multi-informant data collection, and incremental validity.

Clinician's Handbook of Child Behavioral Assessment Michel Hersen, 2011-04-28. Given the vast amount of research related to behavioral assessment, it is difficult for clinicians to keep abreast of new developments. In recent years, there have been advances in assessment, case conceptualization, treatment planning, treatment strategies for specific disorders, and considerations of new ethical and legal issues. Keeping track of advances requires monitoring diverse resources limited to specific disorders, many of which give short shrift to child assessment, overlooking developmental considerations. Much of the existing literature is either theoretical research in focus or clinical in nature. Nowhere are the various aspects of child behavioral assessment placed in a comprehensive research/clinical context, nor is there much integration as to conceptualization and treatment planning. The Clinician's Handbook of Child Behavioral Assessment was created to fill this gap, summarizing critical information for child behavioral assessment in a single source. The Clinician's Handbook of Child Behavioral Assessment provides a single source for understanding new developments in this field, cutting across strategies, techniques, and disorders. Assessment strategies are presented in context with the research behind those strategies, along with discussions of clinical utility and how assessment and conceptualization fit in with treatment planning. The volume is organized in three sections, beginning with general issues, followed by evaluations of specific disorders and problems, and closing with special issues. To ensure cross-chapter consistency in the coverage of disorders, these chapters are formatted to

contain an introduction assessment strategies research basis clinical utility conceptualization and treatment planning a case study and summary Special issue coverage includes child abuse assessment classroom assessment behavioral neuropsychology academic skills problems and ethical legal issues Suitable for beginning and established clinicians in practice this handbook will provide a ready reference toward effective child behavioral assessment **Evidence-Based Practice in Infant and Early Childhood Psychology** Barbara A.
