Caribbean Migration United States. Congress. House. Committee on the Judiciary. Subcommittee on Immigration, Refugees, and International Law,1981 **The Discipline of Subjectivity** Ermanno Bencivenga,2014-07-14 Through an interpretation of Montaigne s philosophical vision as expressed in his Essays Ermanno Bencivenga contributes to the current debate about the death of the subject by developing a view of the self as a project of continuous construction rather than the source and foundation of knowledge This latter Cartesian conception of self consciousness as a logical and epistemological starting point is Bencivenga contends delusive the certainty it provides is more akin to faith than to a cognitive state How then do we acquire knowledge of the self Montaigne makes for a productive case study in this regard he declares that he himself is the matter of his book and that nothing but the constitution of his own self is his business A study of Montaigne reveals that the fundamental category missing in the Cartesian conception of the self is that of practical effort The self is not a ready made entity available for inspection and analysis but something whose generation requires exercise training and discipline It is the result of an operation that must be performed not just once but as in all training over and over again until it becomes second nature Bencivenga characterizes the particular training required by the project of constituting a subject as a revolutionary transgressive critical one which shares with philosophical activity a profoundly playful irrelevance to the ready to hand Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The Family and the Nation* Sarah van Walsum,2008-12-18 Until recently migration policies primarily targeted labour migrants and asylum seekers Family migration was taken for granted But now many nations are restricting family migration particularly from poorer countries The Netherlands have even gone so far as to require family migrants to pass an integration test before being allowed to enter the country How can this shift in policies be explained Does it as some suggest indicate a new trend towards racist exclusion This book places family migration policies in the broader perspective of changing family norms In doing so it shows the added value of studying immigration law not as an isolated field but in connection with other fields of law and policy Taking the Netherlands as an example it shows how family migration policies have evolved from a system premised on the male breadwinner citizen s right to domicile to one granting and restricting freedom of movement according to individual merit Although grounded in a different ethos the techniques of power now being used to enforce the emerging distinctions of a globalising world are in fact reminiscent of those once used to enforce the racial and gendered distinctions of the colonial past Hearings United States.
