Experts and key personnel straddling academia and related agencies and industries provide critical data for further exploration and research. Experts in these various areas who provide relevant data for further exploration and research include: former Head of the Nuclear Reactors Directorate of the CEA; Director of the Potential Gas Agency who leads a team of 100 geologists, geophysicists, and petroleum engineers; former CEO of an Icelandic engineering company that specializes in the design, construction, and operation of Kalina binary power plants for geothermal, biomass, and industrial waste heat recovery applications; Chairman of the Scottish Hydrogen and Fuel Cells Association; former Director of the Geo Heat Center at the Oregon Institute of Technology who received the Patricius Medal from the German Geothermal Association for his pioneer work in the direct use of geothermal energy; Division Director of NETL's Strategic Center for Coal who provides expert guidance and consultation to major DOE-funded clean coal technology and carbon sequestration demonstration projects; an internationally recognized expert in the physics and technology of Inertial Confinement Fusion (ICF); former Senior Scientist and Director of the Center for Distributed Generation and Thermal Distribution with Washington State University who was responsible for state policy, technical assistance to resource developers, and investigations related to geothermal energy development; a main author on the 2005 Billion Ton Report and 2011 Billion Ton Update; and many more, extremely well published and well known individuals straddling academia and related agencies and industries.
