Army Special Operation Combatives Program Manual:

U.S. Army Special Warfare Medical Group SPECIAL OPERATIONS COMBAT MEDICAL SKILLS SUSTAINMENT COURSE: Tactical Combat Casualty Care (TCCC) Training For The SOF Advanced Tactical Practitioner (ATP) ,

Scope a USSOCOM's principle function is to prepare SOF to carry out assigned missions. This responsibility is derived from US Code Title 10 Section 167. In addition to organizing training and equipping SOF for unique missions, medical education is fundamental to fulfilling this law. Title 10 explicit responsibilities include development of strategy, doctrine, tactics, conducting specialized courses of medical instruction for commissioned and non-commissioned officers, and monitoring the medical education and professional certification of officers and enlisted personnel. USSOCOM's medical education and certification responsibilities are inherent responsibilities of developing strategy, doctrine, and tactics. b The Commander, United States Special Operations Command (CDR USSOCOM) has the service-like responsibility of providing joint training and education venues that specialize in the art and science of joint Special Operations and its medical support. These efforts complete the education and training picture within the Department of Defense (DOD). While each of the Services and the joint community provide education and training to fill a particular niche (i.e., naval warfare, air warfare, joint warfare, etc.), the Joint Special Operations Medical Training Center (JSOMTC) within USSOCOM and the Air Force's Pararescue PJ course provides training to fill the medical niche of joint SOF core task requirements. SOF medical training and certification is force-wide, designed to initiate, maintain, and/or enhance medical skills of those SOF medics and non-medics who are required to perform the unique global multi-discipline mission of USSOCOM. Within the parameters of this directive as outlined by first reference Glossary Section III, USSOCOM's primary responsibility is the medical education and training and certification of SOF. A secondary responsibility is the training and education of select DOD interagency and international military personnel in the requirements, capabilities, and limitations of joint special operations organizations. Fostering a mutual understanding ensures the proper application of SOF and the enhancement of joint combined and interagency medical operations. General In support of the Global War On Terrorism (GWOT), Special Operations medical personnel often find themselves providing care for both trauma and non-traumatic medical emergencies beyond the Forward Edge of the Battlefield (FEb) Area Forward Line Of Troops (AFLT) often in non-linear environments that may be far forward of any supporting medical infrastructure. This directive identifies the authority, mission, command relationships, functions, and responsibilities of the United States Special Operations Command as directed under Section 167, Title 10 of US Code to provide SOF medics with the required skill sets. In order to define and administer this SOF Medical skill set, USSOCOM has established a SOF Emergency Medical Services (EMS) State that is administered by the Command Surgeon. Medics who successfully complete the required academic requirements as defined within this directive will thus be known as SOF Advanced Tactical Practitioners (ATP). **Special Warfare**, 2011

REQUIREMENT Version 1 1 4 September 2018 ACFT Field Test Highlight Poster Final OVERVIEW The Army will replace the
Army Physical Fitness Test APFT with the Army Combat Fitness Test ACFT as the physical fitness test of record beginning in
FY21 To accomplish this the ACFT will be implemented in three phases Phase 1 Initial Operating Capability IOC includes a
limited user Field Test with approximately 60 battalion sized units from across all components of the Army While the ACFT is
backed by thorough scientific research and has undergone several revisions there are still details that have not been finalized
The ACFT requires a testing site with a two mile run course and a flat field space approximately 40 x 40 meters The field
space should be grass well maintained and cut or artificial turf that is generally flat and free of debris While maintaining
testing standards and requirements commanders will make adjustments for local conditions when necessary The start and
finish point for the two mile run course must be in close proximity to the Leg Tuck station When test events are conducted
indoors the surface must be artificial turf only Wood and rubberized surfaces are not authorized as they impact the speed of
the Sprint Drag Carry When environmental conditions prohibit outdoor testing an indoor track may be used for the 2 Mile
Run The Test OIC or NCOIC are responsible to inspect and certify the site and determine the number of testing lanes There
should not be more than 4 Soldiers per testing group for the SPT HRP and SDC The OIC or NCOIC must add additional lanes
or move Soldiers to a later testing session to ensure no more than 4 Soldiers per testing group Concerns related to Soldiers
graders or commanders will be addressed prior to test day The number of lanes varies by number of Soldiers testing A 16
lane ACFT site will have the following ACFT specific test equipment requirements 16 hexagon trap bars 60 pounds each with
a set of locking collars While all NSN approved hexagon bars must weigh 60 pounds there is always a small manufacturer s
production tolerance The approved weight tolerance for the hexagon bar is 2 pounds 58 62 pounds Weight tolerance for the
hexagon bar and therefore the 3 Repetition Maximum Deadlift does not include the collars On average hexagon bar collars
weigh 2 0 pounds per pair and are considered incidental to the totalweight of the MDL weight Approximately 3 000 lbs of
bumper plates 16 x 10 lb medicine ball 16 x nylon sled with pull straps 32 x 40 lb kettle bells Permanent or mobile pull up
