Norman,Cees P.M. van der Vleuten,D.I. Newble,2012-12-06 GEOFF NORMAN McMaster University Hamilton Canada CEES VAN DER VLEUTEN University of Maastricht Netherlands DA VID NEWBLE University of Sheffield England The International Handbook of Research in Medical Education is a review of current research findings and contemporary issues in health sciences education The orientation is toward research evidence as a basis for informing policy and practice in education Although most of the research findings have accrued from the study of medical education the handbook will be useful to teachers and researchers in all health professions and others concerned with professional education The handbook comprises 33 chapters organized into six sections Research Traditions Learning The Educational Continuum Instructional Strategies Assessment and Implementing the Curriculum The research orientation of the handbook will make the book an invaluable resource to researchers and scholars and should help practitioners to identify research to place their educational decisions on a sound empirical footing THE FIELD OF RESEARCH IN MEDICAL EDUCATION The discipline of medical education began in North America more than thirty years ago with the founding of the first office in medical education at Buffalo New York by George Miller in the early 1960s Soon after large offices were established in medical schools in Chicago University of Illinois Los Angeles University of Southern California and Lansing Michigan State University All these first generation offices mounted master s level programs in medical education and many of their graduates went on to found offices at other schools **Manual of Definitive Surgical Trauma Care 2E** Kenneth Boffard,2007-08-31 Unless dealing

with injury regularly few surgeons can attain and sustain the level of skill necessary for decision making in major trauma This includes both the intellectual decisions and the manual dexterity required to perform all the manoeuvres needed for surgical access and control These can be particularly challenging and may be infrequently required yet rapid access to and control of sites of haemorrhage following trauma can be life saving surgical intervention Many situations require specialist trauma expertise yet often this is simply not on hand within the available time frame Manual of Definitive Surgical Trauma Care Second Edition is written by the editorial board of the DSTCTM which is a short course focusing on the life saving surgical techniques and surgical decision making required for surgeons who deal with major surgical trauma on an infrequent basis This course supplements the well recognized and accepted American College of Surgeons Advanced Trauma Life Support ATLS course This manual is published in association with IATSIC the International Association for the Surgery of Trauma and Surgical Intensive Care and is written by an Editorial Board of surgeons who belong to that society IATSIC are broadening their reach and running more and more courses worldwide This new second edition has been updated to incorporate all recent developments in this rapidly progressing area It emphasizes how practical real life decisions on the care of the injured patient should be made and then covers in practical terms the surgical techniques required Every aspect of surgical trauma care is covered including the causation of injuries aids rapid understanding of presented trauma the initial pre hospital and emergency department care of the patient all of which may determine eventual outcome the resources required both physical and intellectual within the hospital to deal with the specific problems associated with patients with multiple injuries the limitations in providing specialist expertise within the time frame required It is an ideal practical manual for both trainees and qualified surgeons

The Hands-on Guide to Surgical Training Matthew Stephenson, 2011-11-16 Thinking about a surgical career About to start surgical training Do you know what to expect and how to thrive The Hands on Guide to Surgical Training is the ultimate practical guide for medical students and junior doctors thinking about taking the plunge into surgery and also for surgical trainees already in training It s full of invaluable practical information and career guidance to ensure you get the most out of your surgical career It offers general guidance and advice on surgical training together with detailed information on each of the nine surgical subspecialties each written by seniors and consultants as you make both clinical and career based choices Undoubtedly one of the most comprehensive resources for surgical trainees available The Hands on Guide to Surgical Training will be essential reading throughout your training and surgical career Take the stress out of surgical training with The Hands on Guide

Trauma Team Dynamics Lawrence Marshall Gillman, Sandy Widder, 2025-09-12 The majority of medical errors are non technical in nature stemming from faulty decision making asynchronous information gathering lack of situational awareness and ineffective communication and team leadership Reviews of accidents from other high risk industries including the airline industry have had similar findings This led the National Aeronautics and Space Administration NASA and the airline industry to develop crew now crisis resource

management CRM training These team based training strategies address non technical skills to counteract human error and improve team and patient safety Medicine has begun adapting this training especially within the realms of anesthesia and critical care Trauma surgery has been slower to utilize this work however simulation based training is increasing in popularity The first edition of Trauma Team Dynamics was a revolutionary book in the field of trauma care It was the first text that integrated the complexities of trauma care but illustrated how these could be streamlined and improved through a team based focus and training CRM and team based training has grown substantially in the past six years since this text was conceived and there have been significant developments both in the breadth of the training as well as refinement in the topics covered teaching methods utilized and strategies employed to overcome the multitude of challenges still faced in this area The second edition of this text expands greatly on the initial CRM topics covered in the opening section of the book Hot topics in CRM training including the concepts of followership and conflict resolution and highlights strategies such as mindfulness and others to manage stress and reduce burnout are discussed The text also expands into novel areas of trauma care including less invasive bedside endovascular treatments such as REBOA Resuscitative Endovascular Balloon Occlusion of the Aorta and a more in depth discussion of teleresuscitation and trauma care in austere environments Featuring 28 new chapters the second edition of Trauma Team Dynamics is written by experts in trauma critical care emergency medicine nursing respiratory therapy and pre hospital care and include NASA and United States military affiliated experts It is intended for use as both a day to day clinical resource and a reference text and includes self assessment questions as well as guidance on CRM curriculum design and implementation

The Trauma Manual Andrew B. Peitzman, Michael Rhodes, C. William Schwab, 2008 The thoroughly updated Third Edition of this popular and widely used pocket reference guides the trauma team through every aspect of patient care after injury and before during and after acute care surgery from prehospital care to resuscitation treatment of specific organ injuries priorities in intensive care and management of special situations Designed for rapid on the spot information retrieval this manual will be a staple reference in emergency departments and trauma centers Flow charts algorithms sequential lists and tables throughout facilitate quick clinical decision making More than 200 illustrations demonstrate specific injuries and procedures Appendices include organ injury scales tetanus prophylaxis recommendations and frequently used forms

Trauma Operative Procedures H. Delooy, 1999 Trauma has assumed a prominent role in contemporary medicine as an event that can significantly influence clinical variables such as morbidity functional deficits and consequential disability and mortality Trauma is the principal cause of death in the population below 40 years of age in industrialized countries Therefore there is great interest in studying traumatic events from both the clinical and epidemiological viewpoints The importance of trauma is exemplified by the fact that in many countries the trauma patient is first treated in specialized trauma centers in which the diagnostic and treatment processes are facilitated by the 24 hour presence of personnel having interdisciplinary competencies Trauma in this context

consists of any acute often unexpected condition Many of the medical difficulties associated with trauma occur in a relatively brief period that spans from the first call for help to the initiation of first aid measures A correct approach depends on the availability of experienced personnel The first measures of aid must guarantee above all the patient's survival The most critical initial phases of care to trauma patients are represented by the triad first aid triage and transport Specific morbidity indices whether anatomical functional or mixed are indispensable elements for monitoring a patient's clinical evolution The immediate availability of essential drugs is imperative to confront the clinical situations that often present in the acute post-traumatic phase
