Rehg, Susan A. Murphy, Santosh Kumar, 2017-07-12 This volume provides a comprehensive introduction to mHealth technology and is accessible to technology oriented researchers and practitioners with backgrounds in computer science engineering statistics and applied mathematics The contributing authors include leading researchers and practitioners in the mHealth field The book offers an in depth exploration of the three key elements of mHealth technology the development of on body sensors that can identify key health related behaviors sensors to markers the use of analytic methods to predict current and future states of health and disease markers to predictors and the development of mobile interventions which can improve health outcomes predictors to interventions Chapters are organized into sections with the first section devoted to mHealth applications followed by three sections devoted to the above three key technology areas Each chapter can be read independently but the organization of the entire book provides a logical flow from the design of on body sensing technology through the analysis of time varying sensor data to interactions with a user which create opportunities to improve health outcomes This volume is a valuable resource to spur the development of this growing field and ideally suited for use as a textbook in an mHealth course **Reproducible Research in Pattern Recognition** Bertrand Kerautret, Miguel Colom, Adrien Krähenbühl, Daniel Lopresti, Pascal Monasse, Hugues Talbot, 2021-05-13 This book constitutes the thoroughly refereed post workshop proceedings of the Third International Workshop on Reproducible Research in Pattern Recognition RRPR 2021 held as a virtual event in January 2021

The 8 revised full papers presented together with 6 short papers were carefully reviewed and selected from 18 submissions. The papers were organized into three main categories. The first contributions focused on reproducible research frameworks. The second category focused on reproducible research results and the last category included ICPR companion papers describing implementation and details that are an absolute requirement for reproducibility.

Handbook of Research on Consumer Behavior Change and Data Analytics in the Socio-Digital Era Keikhosrokiani, Pantea, 2022-06-24

The emergence of new technologies within the industrial revolution has transformed businesses to a new socio digital era. In this new era, businesses are concerned with collecting data on customer needs, behaviors, and preferences for driving effective customer engagement and product development, as well as for crucial decision making. However, the ever-shifting behaviors of consumers provide many challenges for businesses to pinpoint the wants and needs of their audience. The Handbook of Research on Consumer Behavior Change and Data Analytics in the Socio Digital Era focuses on the concepts, theories, and analytical techniques to track consumer behavior change. It provides multidisciplinary research and practice focusing on social and behavioral analytics to track consumer behavior shifts and improve decision making among businesses. Covering topics such as consumer sentiment analysis, emotional intelligence, and online purchase decision making, this premier reference source is a timely resource for business executives, entrepreneurs, data analysts, marketers, advertisers, government officials, social media professionals, libraries, students, and educators of higher education, researchers, and academicians.

Cognitive Social Mining Applications in Data Analytics and Forensics Haldorai, Anandakumar, Ramu, Arulmurugan, 2018-12-14

Recently, there has been a rapid increase in interest regarding social network analysis in the data mining community. Cognitive radios are expected to play a major role in meeting this exploding traffic demand on social networks due to their ability to sense the environment, analyze outdoor parameters, and then make decisions for dynamic time frequency space resource allocation and management to improve the utilization of mining the social data. Cognitive Social Mining Applications in Data Analytics and Forensics is an essential reference source that reviews cognitive radio concepts and examines their applications to social mining using a machine learning approach so that an adaptive and intelligent mining is achieved. Featuring research on topics such as data mining, real-time ubiquitous social mining services, and cognitive computing, this book is ideally designed for social network analysts, researchers, academicians, and industry professionals.
