An Archaeology of History and Tradition Christopher N. Matthews,2012-12-06 As the foundations of the modern world were being laid at the beginning of the 19th century Annapolis Maryland identified itself as the Ancient City This unusual appellation has served Annapolis into the present as a city that has consistently defined and redefined for

itself what being ancient means The process of historical recognition and preservation that has played out in Annapolis provides valuable insights into the way modern Americans in general have come to know and use the past Though often conceived to be in opposition modernity and tradition can be paired as cultural strategies that allow the modern world to be articulated with the tradition it hoped to replace The multiple histories and historic landscapes derived from archaeological investigations in Annapolis are presented to show that the physical world below the surface of the city has been defined by constructions of modernity in tandem with the survival of certain traditions

Thinking Medieval M. Bull, 2005-09-27 This book is aimed at students coming to the study of western European medieval history for the first time and also graduate students on interdisciplinary medieval studies programmes It examines the place of the Middle Ages in modern popular culture exploring the roots of the stereotypes that appear in films on television and in the press and asking why they remain so persistent The book also asks whether medieval is indeed a useful category in terms of historical periodization It investigates some of the particular challenges posed by medieval sources and the ways in which they have survived And it concludes with an exploration of the relevance of medieval history in today's world

The Ancient Beginnings of Science From Pre-Science to the Age of Greece, With Modern-Day Applications Ronald A. Brown, 2020-03-17 The Ancient Beginnings of Science From Pre Science to the Age of Greece With Modern Day Applications By Ronald A Brown For more than 2 500 years it has been assumed that science and mathematics originated solely in ancient Greece however this assumption is now known to be invalid Recently available knowledge has shown that the ancient Hindus must also be included as one of the earliest precursors of modern mathematics and science according to a set of criteria developed by Ronald A Brown namely the trifecta of philosophy theory and abstract mathematics This trifecta implies that only the early Hindus and Greeks are true forerunners of modern science as they alone were the first to recognize that nature is rational and can therefore be understood by human reason The ensuing developments including selected modern topics are discussed in historical detail and demonstrate that the role of history is to clarify what is significant what remains after having distilled out what is not essential
