Technoculture in Don DeLillo's Novels Laila Sougri,2023-09-04 This book is the first to explore technoculture in all of Don DeLillo s novels From Americana 1971 to The Silence 2020 the American author anatomizes the constantly changing relationship between culture and technology in overt and layered aspects of the characters experiences Through a tendency to discover and rediscover technocultural modes of appearance DeLillo emphasizes settings wherein technological progress is implicated in cultural imperatives This study brings forth representations of such implication interaction through various themes particularly perception history reality space architecture information and the posthuman The chapters are based on a thematic structure that weaves DeLillo s novels with the rich literary criticism produced on the author and with the various

theoretical frameworks of technoculture This leads to the formulation and elaboration on numerous objects of research extracted from DeLillo s novels namely the theorization of DeLillo s radiance in dailiness the investigation of various uses of technology as an extension the role of image technologies in redefining history the reconceptualization of the ethical and behavioral aspects of reality the development of tele visual and embodied perceptions in various technocultural spaces and the involvement of information technologies in reconstructing the beliefs behaviors and activities of the posthuman One of the main aims of the study is to show how DeLillo s novels bring to light the constant transformation of technocultural everydayness It is argued that though such transformation is confusing or resisted at times it points to a transitional mode of being This transitional state does not dehumanize DeLillo s characters it reveals their humanity in a continually changing world

overriding question what are the roles forms and conditions of alienation and resistance in our culture and its diverse media The contributors to this collection find examples of both alienation and resistance everywhere from sixteenth century drama to contemporary fiction from American comics to Eastern European cinema from representations of the body to the site of the body itself In seeking out these representations of alienation and resistance the essays begin also to probe the limits and limitations of such terms As such the collection as a whole offers both a broad overview of the field of play as it stands today and makes tentative suggestions as to potential paths of future inquiry

The Imagery of Writing in the Early Works of Paul Auster Clara Sarmiento, 2017-01-06 The early works of Paul Auster convey the loneliness of the individual fully committed to the work of writing as if he were confined within the book that dominates his life All through Auster's poetry essays and fiction the work of writing is an actual physical effort an effective construction as if the words aligned in the poem text were stones to place in a row when building a wall or some other structure in stone This book studies the symbolism of the genetic substance of the world re built through the work of writing inside the walls of the room closed in space and time though open to an unlimited mental expansion Paul Auster's work is an aesthetic literary self reflection about the mission of writing The writer character is like an inexperienced God whose hands may originate either cosmos or chaos life or death hence Auster's recurring meditation on the work and the power of writing at the same time an autobiography and a self criticism The stones the wall and the room the words the page and the book are the ontological structure of the imaginary cosmos generated in Paul Auster's mind like a real world born of the magma of words lost in another interior world
