Unsaid By Neil Abramson:

Unsaid Neil Abramson, 2011-08-04 In this USA Today bestselling debut novel Neil Abramson explores the beauty and redemptive power of human animal relationships and the true meaning of communication in all of its diverse forms As a veterinarian Helena was required to choose when to end the lives of the terminally ill animals in her care Now that she has died she is afraid to face them and finally admit to herself that her thirty seven years of life were meaningless error ridden and forgettable So Helena lingers a silent observer haunted by the life she left behind her shattered attorney husband David her houseful of damaged but beloved animals and her final project Cindy a chimpanzee trained to use sign language who may be able to unlock the mysteries of animal communication and consciousness When Cindy is scheduled for a research experiment that will undoubtedly take her life David must call upon everything he has learned from Helena to save her In the explosive courtroom drama that follows all the threads of Helena's life entwine and tear as Helena and David confront their mistakes grief and loss and discover what it really means to be human Abramson's next novel **JUST LIFE** published in May 2016

Narratology Beyond the Human David Herman, 2018 To what extent and in what manner do storytelling practices accommodate nonhuman subjects and their modalities of experience and how can contemporary narrative study shed light on interspecies interactions and entanglements In *Narratology beyond the Human* David Herman addresses these questions through a cross disciplinary approach to post Darwinian narratives concerned with animals and human animal relationships Herman considers the enabling and constraining effects of different narrative media examining a range of fictional and nonfictional texts disseminated in print comics and graphic novels and film In focusing on techniques such as the use of animal narrators alternation between human and nonhuman perspectives the embedding of stories within stories and others the book explores how specific strategies for portraying nonhuman agents both emerge from and contribute to broader attitudes toward animal life Herman argues that existing frameworks for narrative inquiry must be modified to take into account how stories are interwoven with cultural ontologies or understandings of what sorts of beings populate the world and how they relate to humans Showing how questions of narrative bear on ideas of species difference and assumptions about animal minds *Narratology beyond the Human* underscores our inextricable interconnectedness with other forms of creatural life and suggests that stories can be used to resituate imaginaries of human action in a more than human world
