China Developing: Cultural Identity Of Emerging Societies George Fusun Ling, 2008-03-13 This book deals with the intellectual foundation of the sociopolitical economic and legal systems of developing countries using a methodological approach It calls for not only the need to search for a country's cultural identity but also a need to analyze the prevalent concepts important to a contemporary modern society such as the respect for an individual human rights freedom equality democracy and the universal respect for law Based on the author's lifelong reflection on why some of these deeply treasured Western values and institutions have not been useful in developing democracy in Asia it examines which values are applicable and which are not to Asian emerging societies Using China's historical and contemporary attempts in modernization and development the author suggests that all mighty rivers are confluences of multiple tributaries Likewise an emerging society has to recognize that the dynamism of its history would also be derived from a confluence of multiple cultural traditions As a valuable resource for decision makers of developing countries this book will help to shed some light on the potential pitfalls and fallacies they may encounter in their search for a cultural identity and values to subscribe to among the many that are circulating in our globalized world

Applied Anthropology in Canada Edward J. Hecican, 2008-07-05 Anthropologists are often reluctant to present their work relating to matters of a broad social context to the wider public even though many have much to say about a range of contemporary issues In this second edition of a classic work in the field Edward J Hecican takes stock of Anthropology's research on current indigenous affairs and offers an up to date assessment of Aboriginal issues in Canada from the perspective of applied Anthropology In his central thesis Hecican underlines Anthropology's opportunity to make a significant impact on the way Aboriginal issues are studied perceived and interpreted in Canada He contends that anthropologists must quit lingering on the periphery of debates concerning land claims and race relations and become more actively committed to the public good His study ranges over such challenging topics as advocacy roles in Aboriginal studies the ethics of applied research policy issues in community development the political context of the self government debate and the dilemma of Aboriginal status and identity in Canada *Applied Anthropology in Canada* is an impassioned call for a revitalized Anthropology one more directly attuned to the practical problems faced by First Nations peoples Hecican's focus on Aboriginal issues gives his work a strong contemporary relevance that bridges the gap between scholarly and public

spheres *Public Justice and the Anthropology of Law* Ronald Niezen, 2010-10-21 In this powerful timely study Ronald Niezen examines the processes by which cultural concepts are conceived and collective rights are defended in international law Niezen argues that cultivating support on behalf of those experiencing human rights violations often calls for strategic representations of injustice and suffering to distant audiences The positive impulse behind public responses to political abuse can be found in the satisfaction of justice done But the fact that oppressed peoples and their supporters from around the world are competing for public attention is actually a profound source of global difference stemming from differential capacities to appeal to a remote unknown public Niezen's discussion of the impact of public opinion on law provides fresh insights into the importance of legally constructed identity and the changing pathways through which it is being shaped crucial issues for all those with an interest in anthropology politics and human rights law **Adat and Indigeneity in**

Indonesia Hauser-Schäublin, Brigitta, 2013-11-11 A number of UN conventions and declarations on the Rights of Indigenous Peoples the Protection and Promotion of the Diversity of Cultural Expressions and the World Heritage Conventions can be understood as instruments of international governance to promote democracy and social justice worldwide In Indonesia as in many other countries these international agreements have encouraged the self assertion of communities that had been oppressed and deprived of their land especially during the New Order regime 1966-1998 More than 2 000 communities in Indonesia who define themselves as masyarakat adat or indigenous peoples had already joined the Indigenous Peoples Alliance of the Archipelago AMAN by 2013 In their efforts to gain recognition and self-determination these communities are supported by international donors and international as well as national NGOs by means of development programmes In the definition of masyarakat adat culture or adat plays an important role in the communities self definition Based on particular characteristics of their adat the asset of their culture they try to distinguish themselves from others in order to substantiate their claims for the restitution of their traditional rights and property namely land and other natural resources from the state The authors of this volume investigate how differently structured communities socially politically and religiously and associations reposition themselves vis-à-vis others especially the state not only by drawing on adat for achieving particular goals but also dignity and a better future *Tribal Fantasies* J. Mackay, D. Stirrup, 2012-12-28 This transnational collection discusses the use of Native American imagery in twentieth and twenty-first century European culture With examples ranging from Irish oral myth through the pop image of Indians promulgated in pornography to the philosophical appropriations of Ernst Bloch or the European far right contributors illustrate the legend of the Indian Drawing on American Indian literary nationalism postcolonialism and transnational theories essays demonstrate a complex nexus of power relations that seemingly allows European culture to build its own Native images and ask what effect this has on the current treatment of indigenous peoples **The Globalisation of Modern Architecture** Robert Adam, 2012-04-25 Taking the break up of the Soviet Union and the entry of Russia China and India into the global market as the start of a new era of globalisation Robert

Adam compares new developments in architecture and urban design with major shifts in the balance of power since 1990. Based on the principle that design unavoidably follows social change, politics and economics, this analysis casts a new light on recent architecture. Starting with the lead up to events in the 1990s, links are established between the global dominance of the North Atlantic economies, architectural style and a dramatic increase in international architectural practice. The widely observed homogeneity of the global consumer economy is examined in relation to branding, tourism and international competition between cities and parallels are drawn with universal architectural and urban types, iconic architecture and the rise of the star architect. Contrasting pressures to maintain differences are identified in the break up of nation states, identity politics, targeted marketing and environmentalism, and these are related to attempts to reinforce local identity through architecture and urban design. Using social, political and economic change as a guide to new directions in architecture and urban design, the book ends by tracing the changes in global power revealed by the 2008 Western financial crash and its immediate impact on the built environment. By comparing past patterns of cultural influence, the book speculates on how architecture and urban design may come to reflect wider global trends. *Interpreting Human Rights* Rhiannon

Morgan, Bryan Turner, 2009-05-07. In recent decades, human rights have come to occupy an apparently unshakable position as a key and pervasive feature of contemporary global public culture. At the same time, human rights have become a central focus of research in the social sciences, embracing distinctive analytical and empirical agendas for the study of rights. This volume gathers together original social scientific research on human rights and, in doing so, situates them in an open intellectual terrain, thereby responding to the complexity and scope of meanings, practices and institutions associated with such rights. Chapters in the book examine diverse theoretical perspectives and examine such issues as the right to health, indigenous peoples' rights, cultural politics, the role of the United Nations, women and violence, the role of corporations and labour law. Written by leading scholars in the field and from a range of disciplines across the social sciences, this volume combines new empirical research with both established and innovative social theory. **Learning, Teaching and Social**

Justice in Higher Education Noah Riseman, Sue Rechter, Ellen Warne, 2010. This book brings together a wide range of higher education practitioners from across disciplines. Their chapters suggest innovative approaches to learning, teaching and delivering a tertiary education experience that centres social justice as a core mission of universities. The authors address the ways in which universities grapple with the challenges involved in the selection processes, administration, teaching and learning, and student support associated with an increasingly large student population drawn from a broad range of socioeconomic and cultural backgrounds, including many students who will be returning to live overseas. Some of the specific challenges of these developments have included those of selection, academic literacy, independent learning, student support and student engagement. A second dimension is the traditional role of the universities as sources of independent intellectual and ethical critique of social institutions, both in terms of research and public intellectual contribution to political and social

policy debates and in terms of the formation of students in their capacities as critical ethical citizens and professionals This social ethical critique has traditionally been built into the humanities and the social science disciplines and the helping professions but has now found its way into other disciplines and professional areas such as business and engineering As well broader social policy and political discourse has more explicitly embraced social ethical agendas of inclusiveness and marginalisation of social groups recognition of the damage to the overall society of enduring and increasing social inequality
