Forthcoming Books Rose Arny,2003-12 *College Admissions Data Sourcebook Northeast Edition Looseleaf 2010-11* ,2010-09 **Teachers versus the Public** Paul E. Peterson,Michael Henderson,Martin R. West,2014-04-29 A comprehensive exploration of 21st Century school politics Teachers versus the Public offers the first comparison of the education policy views of both teachers and the public as a whole and reveals a deep broad divide between the opinions held by citizens and those who teach in the public schools Among the findings Divisions between teachers and the public are wider and deeper than differences between other groups often thought to contest school policy such as Republicans and Democrats the young and the old the rich and the poor or African Americans and whites The teacher public gap is widest on such issues as merit pay teacher tenure reform impact of teacher unions school vouchers charter schools and requirements to test students annually Public support for school vouchers for all students charter schools and parent trigger laws increases sharply when people are informed of the national ranking of student performance in their local school district Public willingness to give local schools high marks its readiness to support higher spending levels and its support for teacher unions all decline when the public learns the national ranking of their local schools On most issues teacher opinion does not change in response to new information nearly as much as it does for the public as a whole In fact the gap between what teachers and the public think about school reform grows even wider when both teachers and the public are given more information about current school performance current expenditure levels and current teacher pay The book provides the first experimental study of public and teacher opinion Using a recently developed research strategy the authors ask differently worded questions about the same topic to randomly chosen segments of representative groups of citizens This approach allows them to identify the impact on public opinion of new information on

issues such as student performance and school expenditures in each respondent's community. The changes in public opinion when citizens receive information about school performance are largest in districts that perform below the national average. Altogether the results indicate that support for many school reforms would increase if common core state standards were established and implemented in such a way as to inform the public about the quality of their local schools. These and many other findings illuminate the distance between teacher opinions and those of the public at large. About the Research In partnership with the Harvard Program on Education Policy and Governance and the journal Education Next authors Paul E. Peterson, Martin West, and Michael Henderson surveyed nationally representative samples of teachers and the public as a whole annually between 2007 and 2013. **Monthly Catalog of United States Government Publications**, 1992

Public education is never mentioned in the constitution. Why? Because our founders knew that it was an issue for state and local governments, not the federal one. It's not a coincidence that the more the federal government has inserted itself into public education over the years, the worse our kids have fared. Washington dangles millions of dollars in front of states and then tells them what they have to do to get it. It's backdoor nationalization of education, and it's leading us to ruin. In *Conform*, Glenn Beck presents a well-reasoned, fact-based analysis that proves it's not more money our schools need; it's a complete refocusing of their priorities and a total restructuring of their relationship with the federal government. In the process, he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo. Critics of the current system are just teacher bashers. Teachers' unions put kids first. Homeschooled kids suffer both academically and socially. Local control is an excuse to protect mediocrity. Common Core is rigorous and state-led. Critics of

Common Core are just conspiracy theorists Elementary school teachers need tenure We can't reform schools until we eradicate poverty school choice takes money away from public schools Charter schools perform poorly relative to public schools There is no issue more important to America's future than education The fact that we've yielded control over it to powerful unions and ideologically driven elitists is inexcusable We are failing ourselves our children and our country Conform gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice freedom and accountability Resources in Education, 1997 *The Unofficial, Unbiased Guide to the 331 Most Interesting Colleges 2005* Kaplan, Inc., 2004-06-22 Engaging and informative The Unofficial Unbiased Guide to the 331 Most Interesting Colleges 2005 is a must read reference for every college bound student **How to Be Heard** Celine Coggins, 2017-07-31 THE BOOK FOR EVERY TEACHER WHO HAS EVER BEEN FRUSTRATED BY THE DECISIONS MADE OUTSIDE THEIR SCHOOL THAT AFFECT THE STUDENTS INSIDE THEIR SCHOOL How to Be Heard offers every teacher 10 ways to successfully amplify his or her voice and demonstrates that when teachers' voices are heard they will be rightfully recognized and supported as change leaders in their schools Celine Coggins a renowned teacher advocate offers nuts and bolts strategies that are recognized as the price of admission to becoming a credible and welcomed participant in important policy conversations and decisions The author clearly demonstrates that it is not only possible for teachers to initiate change but to also effectively participate on the policy playing field In ten clear chapters the author demonstrates how teachers can and must advocate for their students and their profession Throughout this book Coggins proves that If you're not at the table you're on the menu This how to guide is filled with concrete ideas for engaging in productive decision making using real world examples from teachers who have successfully used these strategies Ebony, 2001-09 EBONY is the flagship magazine of Johnson Publishing Founded in 1945 by John H Johnson it still maintains the highest global circulation of any African American focused magazine *Report on Education Research*, 1995 *American Educational History Journal* J.
