Water Park Mid-Course Project Tasks

Task #4

Review your results for Module 4 problems 1. Provide a cost analysis of the project to repair the pool.

Include a description of the most relevant inputs, a concise summary the work done, the cost of the project, and the calculations used to find this information. You may want to review problem 2 as well and provide an explanation of the observations in attendance to the waterpark and how this will benefit the park. How will this impact paying for these upgrades?

inducing math problems and it won't be as hard as you think Jason kicks things off with a basic training boot camp to help you review the essential math you'll need to truly get algebra The basics covered you'll be ready to tackle the concepts that make up the core of algebra You'll get step by step instructions and tutorials to help you finally understand the problems that stump you the most including loads of tips on Working with fractions decimals exponents radicals functions polynomials and more Solving all kinds of equations from basic linear problems to the quadratic formula and beyond Using graphs and understanding why they make solving complex algebra problems easier Learning algebra doesn't have to be a form of torture and with The Math Dude's Quick and Dirty Guide to Algebra it won't be Packed with tons of fun features including secret agent math libs and math brain games and full of quick and dirty tips that get right to the point this book will have even the biggest math o phobes basking in a ha moments and truly understanding algebra in a way that will stick for years and tests to come Whether you're a student who needs help passing algebra class a parent who wants to help their child meet that goal or somebody who wants to brush up on their algebra skills for a new job or maybe even just for fun look no further Sit back relax and let this guide take you on a trip through the world of algebra

Algebra Teaching around the World Frederick K.S. Leung, Kyungmee Park, Derek Holton, David Clarke, 2014-10-13 Utilizing the LPS dataset Algebra Teaching around the World documents eighth grade algebra teaching across a variety of countries that differ geographically and culturally Different issues in algebra teaching are reported and different theories are used to characterize algebra lessons or to compare algebra teaching in different countries Many commonalities in algebra teaching around the world are identified but there are also striking and deep rooted differences The different ways algebra was taught in different countries point to how algebra teaching may be embedded in the culture and the general traditions of mathematics education of the countries concerned In particular a comparison is made between algebra lessons in the Confucian Heritage Culture CHC countries and Western countries It seems that a common emphasis of algebra teaching in CHC countries is the linkage or coherence of mathematics concepts both within an algebraic topic and between topics On the other hand contemporary algebra teaching in many Western school systems places increasing emphasis on the use of algebra in mathematical modeling in real world contexts and in the instructional use of metaphors where meaning construction is assisted by invoking contexts outside the domain of algebraic manipulation with the intention to helping students to form connections between algebra and other aspects of their experience Algebra Teaching around the World should be of value to researchers with a focus on algebra pedagogy or international comparisons of education Because of the pedagogical variations noted here there is a great deal of material that will be of interest to both teachers and teacher educators

The Nature and Role of Algebra in the K-14 Curriculum National Research Council, National Council of Teachers of Mathematics and Mathematical Sciences Education Board, Center for Science, Mathematics, and Engineering Education, 1998-09-23 With the 1989 release of Everybody Counts by the Mathematical Sciences Education Board MSEB of the National Research Council and the Curriculum and Evaluation Standards for School Mathematics by the National Council of Teachers of Mathematics NCTM the standards movement in K 12 education was launched Since that time the MSEB and the NCTM have remained committed to deepening the public debate discourse and understanding of the principles and implications of standards based reform One of the main tenets in the NCTM Standards is commitment to providing high quality mathematical experiences to all students Another feature of the Standards is emphasis on development of specific mathematical topics across the grades In particular the Standards emphasize the importance of algebraic thinking as an essential strand in the elementary school curriculum Issues related to school algebra are pivotal in many ways Traditionally algebra in high school or earlier has been considered a gatekeeper critical to participation in postsecondary education especially for minority students Yet as traditionally taught first year algebra courses have been characterized as an unmitigated disaster for most students There have been many shifts in the algebra curriculum in schools within recent years Some of these have been successful first steps in increasing enrollment in algebra and in broadening the scope of the algebra curriculum Others have compounded existing problems Algebra is not yet conceived of as a K 14 subject Issues of opportunity and equity persist Because there is no one answer to the dilemma of how to deal with algebra making progress requires sustained dialogue experimentation reflection and communication of ideas and practices at both the local

and national levels As an initial step in moving from national level dialogue and speculations to concerted local and state level work on the role of algebra in the curriculum the MSEB and the NCTM co sponsored a national symposium The Nature and Role of Algebra in the K 14 Curriculum on May 27 and 28 1997 at the National Academy of Sciences in Washington D C
