Wiltschko, 2021-06-17 A cutting edge work this book analyses the grammar of interactional language with a focus on discourse markers and their typology **The Art of the Essay, 1999** , 1999-09-14 In this newest installment of The Art of the Essay series acclaimed essayist Lopate has selected and introduced the year's most notable influential or surprising essays published during the last 12 months Linguistic Dimensions of Crisis Talk Claudia Sassen, 2005-01-01 This book offers an HPSG based discourse grammar for a controlled language Air Traffic Control that allows the identification of well formed discourse patterns A formalisation of discourse theoretical structures that occur especially in crisis situations that involve potential aviation disasters is introduced Of particular importance in this context are discourse sequences that help secure uptake among the crew and between crew and tower in order to coordinate actions that might result in avoiding a potential disaster In order to describe the relevant phenomena an extended HPSG formalism is used The extension concerns the capability of modelling speech acts as proposed by Searle Vanderveken 1985 The grammar is modelled by employing XML as a denotational semantics and is applied to the corpus data This work thus lays the foundation for the automatic recognition of discourse structures in aviation communication You Are Here James Pollock, 2012-11-15 Northrop Frye wrote that for Canadian poets the question of identity isn't so much Who am I as Where is here In his ground breaking collection of essays You Are Here James Pollock gives his answer that where we are as a literary culture has a great deal to do with our relationship to elsewhere For far too long Canadians have refused to read our poetry in the larger international context of poetry as an art leaving our poets isolated and ignored Pollock sets out to situate our verse on the map of world poetry a map which like one of those incomplete globes from the sixteenth century still leaves Canada largely uncharted Acutely intelligent and unflinchingly honest in its judgements You Are Here is an eye opening guide to the new world of Canadian poetry sensitively exploring the work of such poets as Anne Carson Daryl Hine Jeffery Donaldson Karen Solie and Eric Ormsby The collection ends with a witty treatise on good criticism and a passionate and learned reconsideration of

poetic values making *You Are Here* an essential companion for students and lovers of Canadian poetry everywhere

Arenas of Language Use Herbert H. Clark, 1992 When we think of the ways we use language we think of face to face conversations telephone conversations reading and writing and even talking to oneself These are arenas of language use theaters of action in which people do things with language But what exactly are they doing with language What are their goals and intentions By what processes do they achieve these goals In these twelve essays Herbert H Clark and his colleagues discuss the collective nature of language the ways in which people coordinate with each other to determine the meaning of what they say According to Clark in order for one person to understand another there must be a common ground of knowledge between them He shows how people infer this common ground from their past conversations their immediate surroundings and their shared cultural background Clark also discusses the means by which speakers design their utterances for particular audiences and coordinate their use of language with other participants in a language arena He argues that language use in conversation is a collaborative process where speaker and listener work together to establish that the listener understands the speaker's meaning Since people often use words to mean something quite different from the dictionary definitions of those words Clark offers a realistic perspective on how speakers and listeners coordinate on the meanings of words This collection presents outstanding examples of Clark's pioneering work on the pragmatics of language use and it will interest psychologists linguists computer scientists and philosophers

Gesture and the Dynamic Dimension of Language Susan D. Duncan, Justine Cassell, Elena Terry Levy, 2007 Each of the 21 chapters in this volume reflects a view of language as a dynamic phenomenon with emergent structure and in each gesture is approached as part of language not an adjunct to it In this all of the authors have been influenced by David McNeill's methods for studying natural discourse and by his theory of the human capacity for language The introductory chapter by Adam Kendon contextualizes McNeill's research paradigm within a history of earlier gesture studies Chapters in the first section Language and Cognition emphasize what McNeill refers to as the intrapersonal plane Many of the chapters adduce evidence for McNeill's claim that gestures can serve as a window onto the speaker's mind Chapters in the second section Environmental Context and Sociality emphasize the interpersonal plane and exemplify McNeill's focus on how moment to moment language use is determined by contextual factors The final section of the volume Atypical Minds and Bodies concerns lessons to be learned from studies of aphasic patients autistic children and artificial humans

Knots and their Untying: Essays on Psychological Dilemmas Ann Belford Ulanov, Using the image of knots that are hard and sometimes impossible to untie Ann Ulanov circles around the psychic dilemmas that entangle us sometimes for decades These can be heartrending to us and destructive to others even to those we love Yet these knots so peculiarly our own also open onto human problems we share with others even across the ages Hence working on our knots takes us far down to

taproots of energy and far up and out to bring that vital aliveness into shared existence with others Knots thus comprise a ladder offering footholds and handholds for descending and ascending between what Jung calls Below and Above human and divine What are such knots What to do when forgiveness does not happen What to do with the inferiority of the inferior function With the question of how much lightning can we stand With the perils of individuation These are just a few examples from the essays in this book The reader is invited to browse the essays according to personal interest or to read straight through The surprise is that these vexing knots that tie us up and hold us down also give us a mooring they bind us to a path that is uniquely our own that can bear the fruit of our service to others and to the surrounding whole **Social**

Persuasion after Rhetoric in the Eighteenth Century and Romanticism Yasmin Solomonescu, Stefan H. Uhlig, 2024-07-18 While the question of how rhetoric lost authority to modern philosophical and scientific inquiry has drawn much scrutiny we have paid less attention to how values that were once bound up with rhetoric were rearticulated after its demise This volume explores how persuasion ceased to be the seemingly self evident objective of rhetoric and became instead a variable and substantive focus for discussion in its own right After rhetoric ceded much of its centrality to logic and empirical procedures the significance and implications of persuasion were the subject of renewed attention in a range of different fields including philosophy law poetry novels botany cultural criticism historiography political thought and public lecturing Persuasion after Rhetoric in the Eighteenth Century and Romanticism maps how values of persuasion were adapted and diversified in ways that still resonate with current arguments about conviction understanding and belief Contributors address the figurations of persuasion in a range of theorists and writers from Jean Jacques Rousseau Adam Smith Immanuel Kant Edmund Burke and Mary Wollstonecraft to Samuel Richardson Jane Austen Thomas De Quincey Thomas Campbell William Hazlitt Heinrich Heine William Lloyd Garrison and Frances Ellen Watkins Harper This collection offers a detailed account of persuasive

interests at the threshold of modernity It also prompts us to rethink persuasion now that its continued efficacy seems at risk in a fragmented public sphere *From Grammar to Science* Victor H. Yngve, 1996-12-19 Although efforts have been under way for the past two centuries to treat language scientifically linguists and others who work with language speech or communication have not found an adequate scientific foundation in current linguistic theory Many of the difficulties are caused by longstanding confusions between the logical domain of science and grammar and the physical domain of sound waves and the people who speak and understand In this book therefore the last impediments of tradition the ancient semiotic grammatical foundations of linguistics are set aside We move into the physical domain where theories and hypotheses can be tested against observations of the physical reality Here new foundations are laid that are fully consonant with modern science as practiced in physics chemistry and biology On these foundations is built a structure of testable specific dynamic causal laws of communicative behavior that provides support for treating previously recalcitrant context dependent semantic pragmatic interactive rhetorical and literary phenomena The central role of context in the foundations of the theory provides the insights of scientific lawfulness while still honoring the particularity of situations celebrated in the humanities
